8 Substantial interest in shares: shareholding of 5% and above

According to the Register of Shareholders as at June 30, 2021, no shareholder held more than 5% of the share capital of the Bank except the following;

Shareholders	Holding	Holding (%)
Stanbic IBTC Nominees Nigeria Limited	1,987,692,431	5.81%
Heirs Holdings Limited	1,814,003,900	5.30%

9 Trading in the shares of UBA

A total of 1.8 billon units of UBA shares were traded on the Nigerian Stock Exchange in 2021H1, representing 5.3% of the shares outstanding. The share price waned 15.6% in the period, closing at N7.30 (from N8.65 as at 31 December 2020), reflecting the bearish performance of the Nigerian equity market, as signified by the 5.9% and 7.1% loss in the Nigerian Stock Exchange All Share Index (NSE ASI) and the Banking Sector Index (NSE Bank 10) during the period ended June 30, 2021.

10 Acquisition of own shares

The Bank did not purchase its own shares during the period. Also, the Group has a Board approved Global Personal Investment Policy, which covers directors, staff, and related parties. The policy prohibits employees, directors and related individuals/companies from insider dealings on the shares of UBA Plc and related parties. The essence of the policy is to prevent the abuse of confidential non-public information that may be gained during the execution of UBA's business. In addition, the policy serves to ensure compliance with the local laws and/or regulatory requirements. In accordance with the NSE Rule Book and Amendments to the Listing Rules, UBA observes closed periods, within which affected persons/corporates are restricted from trading on the shares of the Bank. There was no case of violation within the period under review.

11 Donations

As a part of our commitment to the development of host communities, the environment and broader economy within which we operate, across the Group, a total of N287,287,883 (Two Hundred and Eighty Seven Million, Two Hundred and Eighty-Seven Thousand, Eight Hundred and Eighty Three Naira Only) was given out as donations and charitable contributions during the period, through UBA Foundation.

12 Employment and employees

Employment of Physically Challenged Persons

The Bank operates a non-discriminatory policy in the consideration of applicants for employment, including those received from physically challenged persons. The Bank's policy is that the most qualified persons are recruited for the appropriate job levels, irrespective of an applicant's state of origin, ethnicity, religion or physical condition.

Health, Safety at Work and Welfare of Employees

The Bank maintains business premises designed with a view to guaranteeing the safety and healthy working conditions of its employees and customers alike. Employees are adequately insured against occupational and other hazards. The Bank has a comprehensive health insurance scheme for staff, through which medical needs of staff and their immediate family members are met. In addition, the Bank provides first aid in all business offices and has a medical facility at the Head Office. As a part of the investment in the welfare of staff, the Bank maintains an ultra-modern gym facility at the head-office and organizes a quarterly fitness session (tagged "jogging to bond"), held at different stadia across all its country of operations, thereby providing access to various sporting facilities and professional instructors.

Fire prevention and firefighting equipment are installed in strategic locations at all business offices, in addition to hosting a full fire service operation at the Head Office.

The Bank operates a contributory pension plan in accordance with the Pension Reform Act, wherein the Bank contributes 10% of employees' basic salary, housing and transport allowance to the designated pension fund administration chosen by each employee. As a part of the scheme, the Bank also remits employees' contribution of 8% of the relevant compensation to the same account, as provided by the Pension Reform Act , as amended.

Employee Involvement and Training

The Bank encourages participation of its employees in arriving at decisions in respect of matters affecting their well-being. To this end, the Bank provides formal and informal opportunities where employees deliberate on issues affecting the Bank and employees' interest, with a view to making inputs to decision thereon. The Bank places premium on the development of its manpower. In addition to the routine online Executive Chat, wherein employees interact with the Management to discuss issues of customer and employee satisfaction, the GMD/CEO operates an open-door policy and encourages employees to channel suggestions and complaints to him as may be required. The Human Capital Management Division also holds monthly "HR Clinic", a personalized avenue to address relevant employee welfare and career satisfaction issues.

Research and Development

As a part of its daily business, the Bank carries out research into new banking products and services to anticipate and meet customers' need and to ensure excellent service is delivered at all time.

COMPLAINTS AND FEEDBACK

Introduction

United Bank for Africa Plc is a customer-focused Pan-African financial services Group. Our aim is to deliver excellent customer service and provide high quality financial solutions to our over eighteen million customers in the 23 countries where we operate. At each of our multiple contact points with customers, we aim to proactively exceed their expectations. Customer feedback is thus an effective tool in our relentless effort to delight our customers at all points of interaction with the Bank.

To achieve excellent customer service delivery in line with the Bank's focus, UBA Staff worldwide are continuously trained to have a strong customer service orientation and be customer-centric in every aspect of the Bank's operations, thereby fulfilling the Bank's promise to Customers, as contained in its customer service charter. The Bank's customer service charter requires all staff to;

- Be respectful - We know the 'The Customer is King' and is the purpose of our business;
- Be courteous and friendly in all our interactions with the customer;
- Process transactions without delay and attend to enquiries promptly;
- Investigate and resolve complaints promptly;
- Listen attentively;
- Communicate honestly and proactively;
- Leverage our technical knowledge to fully support the customer's needs;
- Show appreciation at all times.

Complaints Channels

To ensure an effective feedback process, UBA has established different channels through which customers can reach the Bank on all issues – be it an enquiry/complaint/request or a feedback. The channels include;

Customer Fulfillment Center (CFC)

A 24/7 Multi-Lingual Customer Contact Centre, where customers can call in to lodge complaints, make requests or enquiries about our products and services.

Dedicated Email Address

A dedicated e-mail address cfc@ubagroup.com is available to customers 24/7 to send in their complaints/requests. This e-mail channel is manned by our highly skilled and effective correspondents that accurately deliver high quality service to UBA customers and prospects alike.

Hotlines in the Branches

Branded toll-free phones called 'UBA Hotline' have been placed in designated Business Offices to enable customers call the Customer Fulfillment Centre to relay their complaints, requests and enquiries. Calls received through this channel are handled by designated inbound call agents. The calls are given priority so as to reassure the customers of the Bank's total commitment to serve them.

Suggestion/Complaint Box

Customers' Complaint boxes are maintained in all our Business Offices to facilitate the tracking, resolution, reporting and dissemination of customer complaints and feedback.

Web

On the UBA website www.ubagroup.com, customers have the option of chatting online real time with our highly skilled Customer Experience Experts through the 'Live Chat' channel and the "How can we help you?" link which is in addition to our social media handles on Face book | Twitter | Instagram

Post

A dedicated Post Office Box number 5551 is also available exclusively for receiving customer complaints by post.

Resolution Structure

In order to ensure that Customers' complaints, enquiries and requests are promptly resolved, the Bank has put in place a dedicated Complaints' Management Team supervised by a Senior Officer of the Bank, who is responsible for prompt investigation and resolution of customers' complaints within the approved timelines. The unit is manned by highly skilled personnel with rich and diverse banking experience to promptly resolve customer

The Bank maintains a robust Customer Complaints Management system, which is managed by well trained staff of the Customer Service Division and reports generated are periodically reviewed by Executive Management to see where processes can be improved to enhance customer service.
The complaints management system ensures that customers' issues are promptly treated as specified within the established framework and turnaround time.

The process flow of Customer complaints and resolution is as follows:
(i) The Bank's touch points (Business offices, Inbound Calls, Telemarketing , E-mail, Live Chat, Social Media; Twitter, Facebook,Leo-Our artificially Intelligent BOT,the first of its type in Africa & Instagram) that receive the customers' grievance acknowledge and register the complaints on any of the bank's Complaint Management Portals depending on the type of issue that the customers may have.

(ii) The complaint is reviewed and it is determined if the complaint could be resolved at first level.
(iii) Where the complaint can be resolved at the first level, a resolution is provided to the customer.
iv) If such a complaint cannot be resolved at the first level, the touch point forwards the complaint to the CFC Follow-Up and Closed Loop Team to follow through till qualitative and satisfactory resolution is achieved
(v) Upon resolution, the customer is contacted and the required feedback provided to the customer.
(vi) The complaint is then closed in the system.
(vii) Where customer is not satisfied with the resolution outcome and a rejoinder is sent, more attention is given to it by the Unit Head to further analyze and resolve the issues raised and final outcome communicated to the customer.

Feedback on Customers' Complaints to the Bank – Monthly Complaints Dash Board

A Monthly Performance Feedback dash board on customers' complaints is provided to Management and relevant Departments within the Bank to address the root causes of complaints and issues raised by customers.
The feedback dash board ensures that:
(i) Improvement opportunities are quickly identified and brought to bear
(ii) The quality of customer service is improved and standardized across all the customer touch points of the Bank
(iii) Customer retention is improved through increased customer satisfaction
(iv) Training and re-training is also done on a regular basis to keep abreast the development in the industry.

Investor Complaint Channels

UBA Plc has a Complaint Framework for Investors and the Investing Public. This policy is published on the Bank's website; *www.ubagroup.com/ir/shareholders* , together with the Complaint Help Channels, which are stated below.

Email: *investorrelations@ubagroup.com*
Telephone: +234-1-2808349
Mailing Address: Head, Investor Relations, UBA House, 57, Marina, Lagos.
Shareholders who have any complaint are enjoined to kindly contact the investor relations unit of the Bank for prompt resolution. Shareholders can also request copies (electronic or hard copies) of the complaint framework, which can also be downloaded on our website in the address stated above.

CORPORATE GOVERNANCE

Introduction

United Bank for Africa Plc (UBA Plc) holds good corporate governance as one of its core values and confirms its commitment to the implementation of effective corporate governance principles in its business operations. The Board of Directors of UBA Plc endorses the principles of best practice Corporate Governance as stated in the Code of Corporate Governance for Banks and Discount Houses in Nigeria 2014 issued by the Central Bank of Nigeria (CBN), the Securities and Exchange Commission's (SEC) Code of Corporate Governance, and the Nigerian Code of Corporate Governance 2018 issued by the Financial Reporting Council (FRC), effective January 1, 2020.

The Board of Directors of UBA Plc has the overall responsibility for ensuring that the highest standards of corporate governance are maintained and adhered to by the Bank. In order to promote effective governance of the UBA Group, the following structures have been put in place for the execution of UBA Plc's Corporate Governance strategy:

1. Board of Directors
2. Board Committees
3. Executive Management Committees
4. Governance Charters

A. The Board

The Board is adequately comprised with the appropriate mix of knowledge, skills, experience, and expertise. As at June 30, 2021, the Board consisted of seventeen (17) members which include a Non-Executive Chairman, a Non-Executive Vice Chairman, eight (8) other Non-Executive Directors (which include three (3) Independent Non-Executive Directors), and seven (7) Executive Directors (which include the GMD/CEO).

Diversity

The Board promotes diversity in its membership for better decision-making, independent judgment and effective governance. There is an appropriate balance of skills and diversity (age, culture and gender) without compromising competence, independence, and integrity. There are currently five (5) female Directors on the Board, constituting 30% of the Board. This demonstrates commitment by the Board towards gender diversity.

Responsibility

The Board of Directors carries out its responsibility through its standing Committees. These are the Board Audit Committee, the Board Credit Committee, the Board Governance Committee, the Board Risk Management Committee, and the Finance and General Purpose Committee. Through the workings of these committees, the Board sets broad policy guidelines and ensures the proper oversight and direction of the Bank.

The roles of Chairman and Chief Executive Officer are separated and clearly defined. The Chairman is primarily responsible for coordinating the affairs of the Board whilst the Chief Executive Officer is responsible for the running of the business and implementation of Board strategy and policy. The Chief Executive Officer is assisted in managing the business of the Bank on a day-to-day basis by the Executive Management Committee, which he chairs and comprises all Executive Directors and other critical functional heads.

The Board's primary responsibility is to increase shareholder wealth. The Board is accountable to shareholders and is responsible for the management of the relationships with its various stakeholders. Executive Management is accountable to the Board for the development and implementation of strategy and policies.

The Board regularly reviews group performance, matters of strategic concern and any other matters it regards as material. The Board meets quarterly and additional meetings are convened as the need arises. In the first half of 2021, the Board met 3 times. The record of attendance for Board Meetings for the half-year ended June 30, 2021 is presented below:

Corporate Governance (Continued)

Director	Number of Meetings Held	Number of Meetings Attended

Mr. Chukwuma Nweke	3	3
Mr. Oliver Alawuba	3	3
Mr. Ayoku Liadi	3	3
Mr. Ibrahim Puri	3	3
Mr. Chiugo Ndubisi	3	3

[1] Appointed to the Board on May 18, 2021.

The Board is responsible for Strategic Direction, Policy Making, Decision Making and Oversight. The Board is also responsible for ensuring that there is an effective system of internal control and risk management across the Bank. The Board also adopts effective systems for the appointment of new Directors.

In accordance with extant Codes of Corporate Governance and the Bank's governance charters, the Board has, through the Board Governance Committee, provided suitable induction programs for new members of the Board, and for existing members, continuous/ongoing training as determined by the Board Governance Committee. The training for Board members is included in the annual training plan for UBA Group which is approved by the Board at the beginning of the year with the annual budget.

As stipulated in the Board Governance & Board Committees Governance Charter, the Board has the authority to delegate matters to Directors, Board Committees and the Executive Management Committee. All Directors are aware that they may take independent professional advice at the expense of the Bank, in the furtherance of their duties. They all have access to the advice and services of the Company Secretary, who is responsible to the Board for ensuring that all governance matters are complied with and assists with professional development as required.

Appointments & Retirements

During the half-year ending June 30, 2021 financial year, the following Director was appointed to the Board:

1. Mrs. Caroline Anyanwu Non-Executive Director

Corporate Governance (Continued)

B. Accountability and Audit

Financial Reporting

The Board has presented a balanced assessment of the Company's position and prospects. The Board is mindful of its responsibilities and is satisfied that in the preparation of the Directors' Report, the Directors have complied with the requirements of the Companies & Allied Matters Act 2020. The Board has also ensured the integrity of the annual reports and accounts and all material information provided to all relevant stakeholders.

The Directors make themselves accountable to the shareholders through regular publication of the Group's financial performance and Annual Reports, and at the Annual General Meeting. The Board has ensured that the Group's reporting procedure is conveyed on the most efficient platforms in order to ensure accuracy. This procedure involves the monitoring of performance throughout the financial year, in addition to monthly reporting of key performance indicators.

Ernst & Young (EY) acted as external auditors to the Group during the half-year ended June 30, 2021. The Report of the External Auditors is as contained in this Half - Year Report.

C. Risk Management & Control Environment

The Group has consistently improved its internal control environment to ensure financial integrity and effective management of risks. The Board has ensured that the Group has in place, robust risk management policies and mechanisms to ensure identification of risk and effective control. The Directors review the effectiveness of the Bank's Internal control environment through regular reports and reviews at Board and Board Audit Committee meetings.

The Board approves the annual budget for the Group and ensures that a robust budgetary process is operated with adequate authorization levels put in place to regulate capital and operating expenses.

D. Shareholder Rights

The Board of UBA Plc has always placed considerable emphasis on effective communication with its shareholders. It ensures that the rights of shareholders are always protected. Notice of meetings and all other statutory notices and information are communicated to the shareholders regularly. The Bank ensures the protection of statutory and general rights of shareholders at all times, particularly their right to vote at General Meetings. All shareholders are treated equally regardless of their equity interest or social status.

The General Meeting of Shareholders is the highest decision-making body of the Bank and meetings are conducted in a fair and transparent manner that gives shareholders the opportunity to express their opinion. The Group publishes quarterly, half-yearly and annual reports on its website as well as national newspapers. The Group also provides investor presentations and other relevant communications that provide requisite information to shareholders and the general public, especially as regards the performance, strategy and developments in the Group.

Besides, the Group maintains an Investor Relations Unit which routinely attends to shareholders' enquiries and ensures that shareholders' views are appropriately escalated to the Management and Board on a continuous basis. In addition, shareholders are encouraged to continuously communicate their opinions and recommendations whenever they see the need to do so, to either the Head of Investor Relations or the Company Secretary. Their contact details are available on the Bank's website and on the back cover of this Annual Report.

E. Board Committees

The Board of UBA Plc has the following Committees, namely:
1. Board Audit Committee
2. Board Credit Committee
3. Board Governance Committee
4. Board Risk Management Committee
5. Finance & General Purpose Committee

Corporate Governance (Continued)

1 Board Audit Committee

The Board Audit Committee was set up to further strengthen internal controls in the Group. It assists the Board of Directors in fulfilling its audit responsibilities by ensuring that effective systems of Financial and Internal controls are in place within the Group.

As at June 30, 2021, the Board Audit Committee comprises the following Non-Executive Directors:
a. Mrs. Owanari Duke – Chairman
b. High Chief Samuel Oni, FCA – Member
c. Erelu Angela Adebayo – Member
d. Mrs. Aisha Hassan Baba – Member
e. Mrs. Caroline Anyanwu - Member

The record of attendance for Board Audit Committee Meetings for half-year 2021 is presented below:

Board Audit Committee Meetings		
Members	**Number of Meetings Held**	**Number of Meetings Attended by Members**
Mrs. Owanari Duke	3	3
High Chief Samuel Oni, FCA	3	3
Erelu Angela Adebayo	3	3
Mrs. Aisha Hassan Baba, OON	3	3
Mrs. Caroline Anyanwu [2]	3	1
[2] Appointed to the Board Audit Committee on May 31, 2021.		

2 Board Credit Committee

The Board Credit Committee is responsible for approval of credit facilities in the Bank. It reviews all credits granted by the Bank and meetings are held at least once a quarter. The Board Credit Committee was set up to assist the Board of Directors to discharge its responsibility to exercise due care, diligence and skill to oversee, direct and review the management of the credit portfolio of the Group. Its terms of reference include determining and setting the parameters for credit risk and asset concentration and reviewing compliance within such limits; determining and setting the lending limits, reviewing and approving the Group's credit strategy and the credit risk tolerance. The Committee reviews the Loan portfolio of the Bank and reviews and approves country risks exposure limits.

As at June 30, 2021, the current composition of the Board Credit Committee is as follows:

a. Mr. Abdulqadir J. Bello – Chairman
b. Mrs. Owanari Duke – Member
c. Ms. Angela Aneke – Member
d. Mr. Kayode Fasola – Member
e. Mrs. Caroline Anyanwu - Member

The record of attendance for Board Credit Committee Meetings for half-year 2021 is presented below:

Mrs. Caroline Anyanwu[3]	3	1
[3] Appointed to the Board Credit Committee on May 31, 2021.		

3 Board Governance Committee

The Board Governance Committee has oversight over the governance structures and practices of the Bank. The Committee has responsibility for the nomination of Directors, Board composition, nomination of Directors for appointment to the Boards of Subsidiaries, recruitment, promotion, redeployment and disengagement of senior level staff, Board & Board Committee performance evaluation, Subsidiary Governance oversight, compensation & remuneration of Directors (including Subsidiary Directors), and Board/Board Committees Inductions and Trainings. The Committee also approves the Human Resources and Governance Policies for the Group, recommends the organisation structure to the Board for approval, resolves work related issues and disputes, and evaluates the overall system of Corporate Governance for the Group.

As at June 30, 2021, the Board Governance Committee comprised the following members:
a. Ms. Angela Aneke – Chairman
b. Mrs. Owanari Duke – Member
c. Erelu Angela Adebayo – Member
d. Mrs. Aisha Hassan Baba – Member

The record of attendance for Board Governance Committee Meetings for half-year 2021 is presented below:

Mr. Kennedy Uzoka	4	4
Mr. Chukwuma Nweke	4	4
Mr. Chiugo Ndubisi	4	4

Corporate Governance (Continued)

F Executive Management Committees

In addition to the Board Committees, there are Management Committees which ensure effective and good corporate governance at the managerial level. These are Committees comprising of senior management of the Bank. The Committees are also risk-driven, as they are basically set up to identify, analyse, synthesize and make recommendations on risks arising from day to day activities of the Bank. They also ensure that risk limits as contained in the Board and Regulatory policies are complied with at all times. They provide inputs for the respective Board Committees and also ensure that recommendations of the Board Committees are effectively and efficiently implemented. They meet as frequently as issues occur to immediately take actions and decisions within the confines of their delegated authorities. Some of these Executive Management Committees include the Assets and Liabilities Committee (ALCO), the Executive Credit Committee (ECC), the IT Risk Committee (ITRC), the Risk Management Committee (RMC), the Procurement Committee (PC), the Criticized Assets Committee (CAC), and the Executive Management Committee (EMC).

G Statutory Audit Committee

The Statutory Audit Committee was set up in accordance with the provisions of the Companies and Allied Matters Act 2020. It comprises of a mixture of Non-Executive Directors and ordinary shareholders elected at the Annual General Meeting.

Its Terms of Reference include the monitoring of processes designed to ensure compliance by the Group in all respects with legal and regulatory requirements, including disclosure, controls and procedures and the impact (or potential impact) of developments related thereto. It evaluates annually, the independence and performance of the External Auditors. The Committee also reviews with Management and the External Auditors the annual audited financial statement before its submission to the Board.
The Members of the Statutory Audit Committee in 2021 are as follows:

a. Mr. Feyi Ogoji – Chairman/Shareholder
b. Mr. Matthew Esonanjor – Shareholder
c.Mr. Alex Adio – Shareholder
d. Mrs. Owanari Duke – Non-Executive Director
e. Ms. Angela Aneke – Non-Executive Director

The record of attendance for the Statutory Audit Committee for half-year 2021 is presented below:

Statutory Audit Committee Meetings		
Members	Number of Meetings Held	Number of Meetings Attended by Members
Mr. Feyi Ogoji	2	2
Mr. Matthew Esonanjor	2	2

Ms. Angela Aneke	2	2
Dr. Kayode Fasola[5]	2	1
Mr. Alex Adio[6]	2	1

[5] Stepped down from the SAC on April 1, 2021
[6] Appointed to the SAC on April 1, 2021

H Meetings Management

In view of current business realities, particularly the advancement of digital technology and the global impact of the COVID-19 pandemic, the Board approved for all Board, Board Committee and Executive Management meetings in 2021 to hold virtually via either Microsoft Teams or Zoom. Towards this purpose, the Board also approved a Virtual Meeting & Communication Technology Framework to promote effective virtual meetings, provide broad guidelines for implementation of processes involving technology aided communication, and ensure compliance with all relevant COVID-19 Related Directives and Safety Protocols & Guidelines.

The Board has also complied strictly with the requirements of the Federal & State Governments and the CAC Guidelines for the convening and conduct of the Bank's Annual General Meetings.

REPORT OF THE STATUTORY AUDIT COMMITTEE

To members of United Bank for Africa Plc

In accordance with the provision of Section 404[7] of the Companies and Allied Matters Act of the Federation of Nigeria 2020 , we the members of the Audit Committee hereby report as follows:

(i) We confirm that we have seen the Audit Plan & Scope, and the Management Letter on the Audit of the UBA Group Interim Consolidated & Separate Financial Statements for the period ended June 30, 2021, and the responses to the said letter.

(ii) In our opinion, the Plan & Scope of the Audit for the period ended June 30, 2021 were adequate. We have reviewed the Auditors' findings and we are satisfied with the Management responses thereon.

(iii) We also confirm that the accounting and reporting policies of the Bank are in accordance with legal requirements and ethical practices.

(iv) As required by the provisions of the Central Bank of Nigeria circular BSD/1//2004 dated February 18, 2004 on "Disclosure of Insider-Related Credits in Financial Statements", we reviewed the insider-related credits of the Bank and found them to be as analysed in the Interim Consolidated & Separate Financial Statements for the period ended June 30, 2021.

MR FEYI OGOJI (FCA)
FRC/2016/ICAN/00000015438
Chairman, Statutory Audit Committee

Members of the audit committee are:
a. Mr. Feyi Ogoji – Chairman/Shareholder
b. Mr. Matthew Esonanjor – Shareholder
c. Mr. Alex Adio – Shareholder
d. Ms. Angela Aneke – Non-Executive Director
e.Mrs. Owanari Duke – Independent Non-Executive Director

STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RELATION TO THE PREPARATION OF FINANCIAL STATEMENTS FOR THE PERIOD ENDED 30 JUNE 2021

In accordance with the provisions of Sections 334 and 335 of the Companies and Allied Matters Act and Sections 24 and 28 of the Banks and Other Financial Institutions Act, the Directors are responsible for the preparation of the financial statements which give a true and fair view of the state of affairs of the Bank and of the profit or loss and other comprehensive income for the period ended June 30, 2021 and in so doing they ensure that:

(i) Proper accounting records are maintained;

(ii) Applicable accounting standards are followed;

(iii) Suitable accounting policies are adopted and consistently applied;

(iv) Judgments and estimates made are reasonable and prudent;

(v) The going concern basis is used, unless it is inappropriate to presume that the Bank will continue in business; and

(vi) Internal control procedures are instituted which as far as reasonably possible, safeguard the assets of the Bank and prevent and detect fraud and other irregularities.

The Directors accept responsibility for the preparation of the financial statements that give a true and fair view in accordance with the International Financial Reporting standards (IFRS) as issued by the International Accounting Standards Board and in the manner required by the Companies and Allied Matters Act, the Financial Reporting Council of Nigeria Act 2011, the Banks and Other Financial Institutions Act, the Central Bank of Nigeria Prudential guidelines and other relevant regulations issued by the Central Bank of Nigeria.

The Directors accept responsibility for the maintenance of accounting records that may be relied upon in the preparation of the financial statements as well as adequate systems of financial control.

Nothing has come to the attention of the Directors to indicate that the Group will not remain a going concern for at least twelve months from the date of this statement.

SIGNED ON BEHALF OF THE DIRECTORS:

Kennedy Uzoka

Independent Auditor's Report

To the Shareholders of United Bank for Africa Plc

Report on the Audit of the Consolidated and Separate Financial Statements

Opinion

We have audited the consolidated and separate financial statements of United Bank for Africa Plc ("the Bank") and its subsidiaries (together "the Group"), which comprise the consolidated and separate statements of financial position as at 30 June 2021, and the consolidated and separate statements of comprehensive income, the consolidated and separate statements of changes in equity and the consolidated and separate statements of cash flows for the six months period then ended, and notes to the consolidated and separate financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated and separate financial statements give a true and fair view of the consolidated and separate financial position of the Group and the Bank as at 30 June 2021, and their consolidated and separate financial performance and consolidated and separate cash flows for the six months period then ended in accordance with International Financial Reporting Standards, the provisions of the Companies and Allied Matters Act, 2020, the Banks and Other Financial Institutions Act, 2020, the Financial Reporting Council of Nigeria Act No. 6, 2011 and the Central Bank of Nigeria circulars.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated and Separate Financial Statements* section of our report. We are independent of the Group and the Bank in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code) together with the ethical requirements that are relevant to our audit of the consolidated and separate financial statements in Nigeria, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated and separate financial statements of the current period. These matters were addressed in the context of our audit of the consolidated and separate financial statements as a whole, and in forming our opinion thereon, we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

Independent Auditor's Report

To the Shareholders of United Bank for Africa Plc - Continued

Key Audit Matters - Continued

We have fulfilled the responsibilities described in the *Auditors' Responsibilities for the Audit of the Consolidated and Separate Financial Statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated and separate financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated and separate financial statements.

The Key Audit Matters applies equally to the audit of the consolidated and separate financial statements.

Key Audit Matter	How the matter was addressed in the audit
Expected Credit Loss (ECL) assessment on loans and advances to customers This is considered a key audit matter in the consolidated and separate financial statements given the significance of the amounts (Gross loans :Group ₦2.7trillion, Bank ₦1.9trillion and Allowance for credit losses: Group ₦91.8billion, Bank ₦62.4billion), and the complexity and judgement involved in the process, which required considerable audit time and expertise. Loans and advances to customers are subject to impairment assessment using the expected credit loss model (ECL) under the International Financial Reporting Standards (IFRS) 9 – Financial Instruments. The ECL involves the application of judgement and estimation in determining inputs for ECL calculation such as: • determining criteria for significant increase in credit risk (SICR) for staging purpose. • determining the relationship between the quantitative factors such as default and qualitative factors such as macro-economic variables.	Our audit procedures included the following: ▸ We checked the reasonableness of IFRS 9 model prepared by management for computation of impairment of loans and advances exposures in line with the requirements of IFRS 9. ▸ We gained an understanding of how the Probability of Default (PD), Loss Given Default (LGD) and Exposure at Default (EAD) were derived by reviewing the Bank's methodology for PD, LGD and EAD and recomputing the parameters. ▸ For loans classified under stages 1 and 2, we selected material loans and reviewed the repayment history for possible repayment default. We tested the various factors considered in classifying the loans within stages 1 and 2 and in the measurement of ECL.

Independent Auditor's Report

To the Shareholders of United Bank for Africa Plc - Continued

Key Audit Matters - Continued

Key Audit Matter	How the matter was addressed in the audit
Expected Credit Loss (ECL) assessment on loans and advances to customers • incorporating forward looking information (FLI) in the model building process. • reasonability and accuracy of macroeconomic historical data and forecasts for unemployment rate, brent crude oil price, interbank rate and credit to private sector which were used by management for FLI analysis. • factors incorporated in determining the Probability of Default (PD), the Loss Given Default (LGD), and the Exposure at Default (EAD). • factors considered in determining the EAD for each time period including the payment frequency, maturity dates, outstanding amount and repayment schedules • factors considered in estimating collateral recoveries including the haircuts applied to the different collateral types See notes 3.27, 4.2, 12 and 25 to the consolidated and separate financial statements for further information.	Our audit procedures included the following: ‣ For stage 3 loans, we checked all assumptions considered in the estimation of recovery cash flows, the discount factor, collateral valuation and the timing of realisation. ‣ We tested the historical accuracy of the data and performed detailed procedures to check the completeness and accuracy of the information used. ‣ Other areas of complexities which include incorporating forward looking information such as macro-economic indicators that were used namely Unemployment Rate, Brent Crude Oil price, Interbank rate and Credit to Private Sector were equally tested for reasonableness taking into consideration available information in the public domain. We reviewed the qualitative and quantitative disclosures for reasonableness to ensure conformity with IFRS 7 Financial Instruments: Disclosures.

Other Information

The Directors are responsible for the other information. The other information comprises the information included in the document titled United Bank for Africa Plc Interim Consolidated and Separate Financial Statements for the period ended 30 June 2021", which includes the Directors' Report, Complaints and Feedback, Corporate Governance Report, Report of the Statutory Audit Committee, Statement of Directors' Responsibilities and Other National Disclosures – Statement of value added and Five year financial summary. The other information does not include the consolidated and separate financial statements and our auditor's report thereon.

Our opinion on the consolidated and separate financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

Independent Auditor's Report

To the Shareholders of United Bank for Africa Plc - Continued

In connection with our audit of the consolidated and separate financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Consolidated and Separate Financial Statements

The Directors are responsible for the preparation and fair presentation of the consolidated and separate financial statements in accordance with International Financial Reporting Standards, the provisions of the Companies and Allied Matters Act, 2020, the Banks and Other Financial Institutions Act, 2020, the Financial Reporting Council of Nigeria Act No. 6, 2011, and the Central Bank of Nigeria circulars, and for such internal control as the Directors determine is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, the Directors are responsible for assessing the Group's and the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group and the Bank or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Consolidated and Separate Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Bank's internal control.

Building a better working world

Independent Auditor's Report

To the Shareholders of United Bank for Africa Plc - Continued

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.

- Conclude on the appropriateness of the Director's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and the Bank to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Directors, we determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Independent Auditor's Report

To the Shareholders of United Bank for Africa Plc - Continued

Report on Other Legal and Regulatory Requirements

In accordance with the requirement of the Fifth Schedule of the Companies and Allied Matters Act, 2020, we confirm that:

- We have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purpose of our audit;
- In our opinion, proper books of account have been kept by the Group and Bank, in so far as it appears from our examination of those books;
- The consolidated and separate statements of financial position and the consolidated and separate statements of profit or loss and other comprehensive income are in agreement with the books of account; and
- In our opinion, the consolidated and separate financial statements have been prepared in accordance with the provisions of the Companies and Allied Matters Act, 2020 so as to give a true and fair view of the state of affairs and financial performance of the Bank and its subsidiaries.

In compliance with the Banks and Other Financial Institutions Act, 2020 and circulars issued by the Central Bank of Nigeria:

i) The information required by the Central Bank of Nigeria Circular BSD/1/2004 on insider related credits is disclosed in Note 41 to the consolidated and separate financial statements.

ii) As disclosed in Note 44 to the consolidated and separate financial statements, the Bank contravened certain circulars of the Central Bank of Nigeria.

The accompanying notes to the financial statements are an integral part of these interim consolidated and separate financial statements.

1 General Information

United Bank for Africa Plc. (the "Group") is a Nigerian registered company incorporated on 23 February 1961 to take over the business of British and French Bank Limited (BFB). UBA listed its shares on the Nigerian Stock Exchange (NSE) in 1970 and became the first Nigerian bank to subsequently undertake an Initial Public Offering (IPO). The company's registered address is at 57 Marina, Lagos, Nigeria.

The interim consolidated financial statements of the Group for the year ended 30 June 2021 comprise the Bank (Parent) and its subsidiaries (together referred to as the "Group" and individually referred to as "Group entities"). The Bank and its subsidiaries are primarily involved in corporate, commercial and retail banking, trade services, cash management, treasury and custodial services.

The financial statements for the period ended 30 June 2021 were approved and authorised for issue by the Board of Directors on 12 August 2021.

2 Basis of preparation

These interim consolidated financial statements comply and have been prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board (IASB) and interpretations issued by the IFRS Interpretations Committee (IFRS IC), and in the manner required by the Companies and Allied Matters Act of Nigeria, the Financial Reporting Council of Nigeria Act, 2011, the Banks and other Financial Institutions Act of Nigeria and relevant Central Bank of Nigeria circulars.

3 Significant accounting policies

3.1 Basis of measurement

These financial statements have been prepared on a historical cost basis, except for the following:

- Derivative financial instruments which are measured at fair value.
- Financial assets measured at fair value through profit or loss.
- Financial instruments measured at fair value through other comprehensive income.

3.2 Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The financial statements are presented in Nigerian Naira (N) which is the Bank's functional currency and the Group's presentation currency.

3.3 Use of estimates and judgements

The preparation of financial statements requires the directors to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, incomes and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised, if the revision affects only that period, or in the period of the revision and future periods, if the revision affects both current and future periods.

3.4 Basis of consolidation

(a) Subsidiaries

Subsidiaries (including structured entities) are entities controlled by the Group. Control exists when the Group has rights to variable returns from its involvement in an entity and has the ability to affect those returns through its power over the entity. The Group also assesses existence of control where it does not have more than 50% of the voting power but is able to govern the financial and operating policies by virtue of de-facto control. Subsidiaries are fully consolidated from the date in which control is transferred to the Group. They are deconsolidated from the date control ceases.

The accounting policies of subsidiaries have been changed, where necessary, to align with the policies adopted by the Group. Losses applicable to the non-controlling interests in a subsidiary are allocated to the non-controlling interests.

In the separate financial statements, investments in subsidiaries are carried at cost less impairment.

(b) Business combinations

Business combinations are accounted for using the acquisition method.

The Group measures goodwill at the acquisition date as the total of:

· the fair value of the consideration transferred; plus

· the amount of any non-controlling interest in the acquiree; plus if the business combination is achieved in stages, the fair value of the existing equity interest in the acquiree;

· less the net amount (generally fair value) of the identifiable assets acquired and liabilities assumed.

When this total is negative, a bargain purchase gain is recognised in the statement of profit or loss.

Non-controlling interests are measured at their proportionate share of the acquiree's identifiable net assets at the acquisition date. Changes in the Group's interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions.

Costs related to the acquisition, other than those associated with the issue of debt or equity securities that the Group incurs in connection with a business combination are expensed as incurred.

3 Significant accounting policies - Continued

3.4 Basis of consolidation - continued

If the business combination is achieved in stages, the acquisition date carrying value of any previously held equity interest in the acquiree is re-measured to fair value at the acquisition date and any gains or losses arising from such re-measurement are recognised in profit or loss.

Any contingent consideration payable is recognised at fair value at the acquisition date. If the contingent consideration is classified as equity, it is not remeasured and settlement is accounted for within equity. Otherwise, subsequent changes to the fair value of the contingent consideration are recognised in profit or loss.

(c) Disposal of subsidiaries

When the Group ceases to have control, any retained interest in the entity is remeasured to its fair value at the date when control is lost, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

(d) Transactions eliminated on consolidation

Intra-group balances and any unrealised gains or losses or incomes and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements. Unrealised gains arising from transactions with associates are eliminated to the extent of the Group's interest in the entity. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

(e) Changes in ownership interests in subsidiaries without change of control

Transactions with non-controlling interests that do not result in loss of control are accounted for as equity transactions. The difference between fair value of any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals of non-controlling interests are also recorded in equity.

(f) Associates

Associates are all entities over which the group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting. Under the equity method, the investment is initially recognised at cost, and the carrying amount is increased or decreased to recognise the investor's share of the profit or loss of the investee after the date of acquisition. The group's investment in associates includes goodwill identified on acquisition. In the separate financial statements, investments in associates are carried at cost less impairment.

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income is reclassified to statement of profit or loss where appropriate.

The Group's share of post-acquisition profit or loss is recognised in statement of profit or loss and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income with a corresponding adjustment to the carrying amount of the investment. When the group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the group does not recognise further losses unless it has incurred legal or constructive obligations or made payments on behalf of the associate.

The Group determines at each reporting date whether there is any objective evidence that the investment in the associate is impaired. If this is the case, the group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value and recognises the amount adjacent to 'share of profit/(loss)' of associates in statement of profit or loss.

Profits and losses resulting from transactions between the Group and its associate are recognised in the Group's financial statements only to the extent of unrelated investor's interests in the associates. Unrealised losses are eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the Group.

Dilution gains and losses arising on investments in associates are recognised in statement of profit or loss.

3.5 Foreign currency

(a) Foreign currency transactions

Foreign currency transactions are recorded at the rate of exchange on the date of the transaction. At the reporting date, monetary assets and liabilities denominated in foreign currencies are reported using the closing exchange rate. Exchange differences arising on the settlement of transactions at rates different from those at the date of the transaction, as well as unrealized foreign exchange differences on unsettled foreign currency monetary assets and liabilities, are recognized in statement of profit or loss.

Unrealized exchange differences on non-monetary financial assets are a component of the change in their entire fair value. For non-monetary financial assets measured at fair value through profit or loss, unrealized exchange differences are recognized in profit or loss. For non-monetary financial assets measured at fair value through other comprehensive income, unrealized exchange differences are recorded in other comprehensive income until the asset is sold or becomes impaired.

(b) Foreign operations

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on acquisition, are translated to Nigerian Naira at exchange rates at each reporting date. The incomes and expenses of foreign operations are translated to Nigerian Naira at average rates.

3 Significant accounting policies - Continued

3.5 Foreign currency - continued

Foreign currency differences are recognised in other comprehensive income, and presented in the translation reserve in equity. However, if the operation is a non-wholly-owned subsidiary, then the relevant proportionate share of the translation difference is allocated to the non-controlling interest. When a foreign operation is disposed of such that control, significant influence or joint control is lost, the cumulative amount in the translation reserve related to that foreign operation is re-classified to profit or loss as part of the gain or loss on disposal.

3.6 Interest income and interest expense

Interest income and expense for all interest bearing financial instruments are calculated by applying the effective interest rate to the gross carrying amount for non-credit impaired financial assets and are recognised within 'interest income' and 'interest expense' in the statement of comprehensive income. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability (or, where appropriate, a shorter period) to the net carrying amount of the financial asset or liability.
For credit-impaired financial assets subsequent to initial recognition, interest income is calculated by applying the credit-adjusted effective interest rate to the amortised cost of the financial asset.

The calculation of the effective interest rate includes all transaction costs and fees paid or received that are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or liability.

3.7 Fees and commissions income and expenses

Fees and commission income and expenses that are integral to the effective interest rate on a financial asset or liability are included in the measurement of the effective interest rate. Other fees and commission income, including account servicing fees, investment management and other fiduciary activity fees, sales commission, placement fees and syndication fees, are recognised at a point in time, or over time as the performance obligations are satisfied.

3.8 Net trading and foreign exchange income

Net trading and foreign exchange income comprises gains less losses related to trading assets and liabilities, and includes all realised and unrealised fair value changes and foreign exchange differences. Net gains or losses on derivative financial instruments measured at fair value through profit or loss are also included in net trading income.

3.9 Dividend income

Dividend income is recognised when the right to receive income is established. Dividends are reflected as a component of other operating income and recognised gross of the associated withholding tax. The withholding tax expense is included as a component of taxation charge for the relevant period.

3.10 Income tax

Income tax expense comprises current and deferred tax. Income tax expense is recognised in statement of profit or loss except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

Current income tax liability is the expected tax payable on taxable income for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for the following temporary differences: the initial recognition of goodwill, the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit, and differences relating to investments in subsidiaries to the extent that they probably will not reverse in the foreseeable future. Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on laws that have been enacted or substantively enacted by the reporting date.

Deferred income tax liabilities are provided on taxable temporary differences arising from investments in subsidiaries and associates, except for deferred income tax liability where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax assets are recognised on deductible temporary differences arising from investments in subsidiaries, associates and joint arrangements only to the extent that it is probable the temporary difference will reverse in the future and there is sufficient taxable profit available against which the temporary difference can be utilised.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities against current tax assets, and they relate to taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

3.11 Cash and bank balances

Cash and bank balances include notes and coins on hand, current balances with other banks, balances held with central banks and placements with banks which are used by the Group in the management of its short-term commitments.

3 Significant accounting policies - Continued

3.11 Cash and bank balances - continued

Cash and cash equivalents as referred to in the statement of cash flow comprises cash on hand, non-restricted current accounts with central banks and amounts due from banks on demand or with an original maturity of three months or less.

Cash and bank balances are carried at amortised cost in the statement of financial position.

3.12 Financial assets at fair value through profit or loss

These are the assets the Group acquires principally for the purpose of selling in the near term, or holds as part of a portfolio that is managed together for short-term profit or position taking. They are measured at fair value with changes in fair value recognised as part of net trading and foreign exchange income in profit or loss.

3.13 Derivative financial instruments

Derivatives are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at their fair value. Fair values are obtained from quoted market prices in active markets, including recent market transactions, and valuation techniques. Derivatives are carried as assets when their fair value are positive and as liabilities when their fair value are negative. All changes in fair value are recognized as part of net trading and foreign exchange income in profit or loss.

3.14 Property and equipment

(a) Recognition and measurement

Items of property and equipment are carried at cost less accumulated depreciation and impairment losses. Cost includes expenditures that are directly attributable to the acquisition of the asset. When parts of an item of property and equipment have different useful lives, they are accounted for as separate items (major components) of property and equipment.

(b) Subsequent costs

The cost of replacing part of an item of property and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Group and its cost can be measured reliably. The costs of the day-to-day servicing of property and equipment are recognised in profit or loss as incurred.

(c) Depreciation

Depreciation is recognised in profit or loss on a straight-line basis over the estimated useful lives of each part of an item of property and equipment since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. Leased assets are depreciated over the shorter of the lease term and their useful lives. Depreciation begins when an asset is available for use and ceases at the earlier of the date that the asset is derecognised or classified as held for sale in accordance with IFRS 5 *Non-current Assets Held for Sale and Discontinued Operations* .

The estimated useful lives for the current and comparative period are as follows:

Land	Not depreciated
Buildings	50 years
Leasehold improvements	Over the shorter of the useful life of item or the lease period
Aircraft	Between 16 and 20 years, depending on the component
Motor vehicles	5 years
Furniture and fittings	5 years
Computer hardware	5 years
Equipment	5 years
Work in progress	Not depreciated
Lifts*	10 years

*In the financial statements, lifts are not treated as a separate class of property and equipment. They are included as part of Buildings.

Work in progress represents costs incurred on assets that are not available for use. On becoming available for use, the related amounts are transferred to the appropriate category of property and equipment.

Depreciation methods, useful lives and residual values are reassessed at each reporting date and adjusted if appropriate. Changes in the expected useful life are accounted for by changing the amortisation period or methodology, as appropriate, and treated as changes in accounting estimates.

(d) De-recognition

An item of property and equipment is derecognised on disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the year the asset is derecognised.

3.15 Intangible assets

(a) Goodwill

Goodwill represents the excess of consideration over the Group's interest in net fair value of net identifiable assets, liabilities and contingent liabilities of the acquired subsidiaries at the date of acquisition. When the excess is negative, it is recognised immediately in profit or loss. Goodwill is measured at cost less accumulated impairment losses.

3 Significant accounting policies - Continued

3.15 Intangible assets - continued

(a) Goodwill - continued

Subsequent measurement

Goodwill is allocated to cash-generating units or groups of cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose. Goodwill is tested annually as well as whenever a trigger event has been observed for impairment by comparing the present value of the expected future cash flows from a cash generating unit with the carrying value of its net assets, including attributable goodwill. Impairment losses on goodwill are not reversed.

(b) Software

Software acquired by the Group is stated at cost less accumulated amortisation and accumulated impairment losses.

Expenditure on internally developed software is recognised as an asset when the Group is able to demonstrate its intention and ability to complete the development and use the software in a manner that will generate future economic benefits, and can reliably measure the costs to complete the development. The capitalised costs of internally developed software include all costs directly attributable to developing the software, and are amortised over its useful life. Internally developed software is stated at capitalised cost less accumulated amortisation and impairment.

Subsequent expenditure on software assets is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is expensed as incurred.

Amortisation is recognised in profit or loss on a straight-line basis over the estimated useful life not exceeding five years, from the date that it is available for use. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at each reporting date. Changes in the expected useful life, or the expected pattern of consumption of future economic benefits embodied in the asset, are accounted for by changing the amortisation period or methodology, as appropriate, which are then treated as changes in accounting estimates.

3.16 Impairment of non-financial assets

The Group assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or CGU's fair value less costs to sell and its value in use. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre–tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded subsidiaries or other available fair value indicators.

For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Group estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceeds the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in statement of profit or loss. Impairment losses relating to goodwill are not reversed in future periods.

3.17 Repossessed collateral

Repossessed collateral represents financial and non-financial assets acquired by the Group in settlement of overdue loans. The assets are initially recognised at fair value when acquired and included in the relevant assets depending on the nature and the Group's intention in respect of recovery of these assets; and are subsequently remeasured and accounted for in accordance with the accounting policies for these categories of assets. Where repossessed collateral results in acquiring control over a business, the business combination is accounted for using the acquisition method of accounting with fair value of the settled loan representing the cost of acquisition (refer to the accounting policy for consolidation). Accounting policy for associates is applied to repossessed shares where the Group obtains significant influence, but not control. The cost of the associate is the fair value of the loan settled by repossessing the pledged shares.

3.18 Debt securities issued

The Group classifies debt and equity as financial liabilities or equity instruments in accordance with the substance of the contractual terms of the instrument.

Debt securities issued are initially measured at fair value plus transaction costs, and subsequently measured at their amortised cost using the effective interest method, except where the Group chooses to carry the liabilities at fair value through profit or loss.

3.19 Provisions

A provision is recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

A provision for restructuring is recognised when the Group has approved a detailed and formal restructuring plan, and the restructuring either has commenced or has been announced publicly. Future operating costs are not provided for.

3 Significant accounting policies - Continued

3.19 Provisions - continued

A provision for onerous contracts is recognised when the expected benefits to be derived by the Group from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Group recognises any impairment loss on the assets associated with that contract.

3.20 Financial guarantee contracts

Financial guarantee contracts are contracts that require the Group (issuer) to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

Financial guarantee liabilities are initially recognised at their fair value, which is the premium received, and then amortised over the life of the financial guarantee. Subsequent to initial recognition, the financial guarantee liability is measured at the higher of the expected credit loss provision and the unamortised premium. Financial guarantees are included within other liabilities.

3.21 Employee benefits

Post-employment benefits

Defined contribution plans

The Group operates defined contribution pension scheme. A defined contribution plan is a pension plan under which the Group makes fixed contributions on contractual basis. The group has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods.

Obligations for contributions to defined contribution plans are recognised as an expense in profit or loss when they are due.

Termination benefits

The Group recognises termination benefits as an expense when the Group is demonstrably committed, without realistic possibility of withdrawal, to a formal detailed plan to either terminate employment before the normal retirement date, or to provide termination benefits as a result of an offer made to encourage voluntary redundancy. The Group settles termination benefits within twelve months and are accounted for as short-term benefits.

Short term employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

A liability is recognised for the amount expected to be paid under short-term employee benefits if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

3.22 Share capital and reserves

(a) Share issue costs

Incremental costs directly attributable to the issue of an equity instrument are deducted from the initial measurement of the equity instruments.

(b) Dividend on ordinary shares

Dividends on the Group's ordinary shares are recognised in equity in the period in which they are paid or, if earlier, approved by the Group's shareholders.

(c) Treasury shares

Where the Group or any member of the Group purchases the Group's shares, the consideration paid is deducted from the shareholders' equity as treasury shares until they are cancelled. Where such shares are subsequently sold or reissued, any consideration received is included in shareholders' equity.

3.23 Earnings per share

The Group presents basic earnings per share (EPS) for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Group by the weighted average number of ordinary shares outstanding during the period.

Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares.

3.24 Fiduciary activities

The Group commonly acts as trustees in other fiduciary capacities that result in the holding or placing of assets on behalf of individuals, trusts, retirement benefit plans and other institutions. These assets and incomes arising thereon are excluded from these financial statements, as they are not assets of the Group.

3.25 Stock of consumables

Stock of consumables comprise materials to be consumed in the process of rendering of services as well as banking accessories held for subsequent issuance to customers. They are measured at the lower of cost and net realisable value. Cost comprises costs of purchase and other costs incurred in bringing the items of stock to their present location and condition. Net realisable value is the estimated issuance price. When items of stock are issued to customers, their carrying amount is recognised as an expense in the period in which the related revenue is recognised.

3 Significant accounting policies - Continued

3.26 Segment reporting

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Group's other components, whose operating results are reviewed regularly by the Executive Management Committee headed by the Chief Executive Officer, and the Board of Directors, to make decisions about resources allocated to each segment and assess its performance, and for which discrete financial information is available. All costs that are directly traceable to the operating segments are allocated to the segment concerned, while indirect costs are allocated based on the benefits derived from such cost.

3.27 IFRS 9: Financial instruments

a. Initial recognition, classification and measurement of financial assets

Regular-way purchases and sales of financial assets are recognized on the settlement date. Financial assets, which include both debt and equity securities are measured at initial recognition at fair value, and are classified and subsequently measured at fair value through profit or loss (FVTPL), fair value through other comprehensive income (FVOCI) or amortised cost. Subsequent classification and measurement for debt securities is based on the business model for managing the financial instruments and the contractual cash flow characteristics of the instruments.

Debt instruments are measured at amortised cost if both of the following conditions are met and the asset is not designated as FVTPL: (a) the asset is held within a business model that is Hold-to-Collect (HTC) as described below, and (b) the contractual terms of the instrument give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding (SPPI).

Debt instruments are measured at FVOCI if both of the following conditions are met and the asset is not designated as FVTPL: (a) the asset is held within a business model that is Hold-to-Collect-and-Sell (HTC&S) as described below, and (b) the contractual terms of the instrument give rise, on specified dates, to cash flows that are SPPI.

All other debt instruments are measured at FVTPL.

The Group has irrevocably elected to measure equity instruments at FVOCI as no equity instrument is held for trading purposes.

b. Business model assessment

The Group determines the business models at the level that best reflects how portfolios of financial assets are managed to achieve the Group's business objectives. Judgment is used in determining the business models, which is supported by relevant, objective evidence including:

• How the economic activities of our businesses generate benefits, for example through trading revenue, enhancing yields or other costs and how such economic activities are evaluated and reported to key management personnel;

• The significant risks affecting the performance of our businesses, for example, market risk, credit risk, or other risks and the activities undertaken to manage those risks; and

• Historical and future expectations of sales of the loans or securities portfolios managed as part of a business model.

The Group's business models fall into three categories, which are indicative of the key strategies used to generate returns:

• Hold-to-Collect (HTC): The objective of this business model is to hold financial assets to collect contractual principal and interest cash flows. Sales are incidental to this objective and are expected to be insignificant or infrequent.

• Hold-to-Collect-and-Sell (HTC&S): Both collecting contractual cash flows and sales are integral to achieving the objective of the business model.

• Other fair value business models: These business models are neither HTC nor HTC&S, and primarily represent business models where assets are held-for-trading or managed on a fair value basis.

3 Significant accounting policies - Continued

3.27 IFRS 9: Financial instruments - Continued

c. SPPI assessment

Instruments held within a HTC or HTC&S business model are assessed to determine if their contractual cash flows are comprised of solely payments of principal and interest (SPPI). SPPI payments are those which would typically be expected from basic lending arrangements. Principal amounts include par repayments from lending and financing arrangements, and interest primarily relates to basic lending returns, including compensation for credit risk and the time value of money associated with the principal amount outstanding over a period of time. Interest can also include other basic lending risks and costs (for example, liquidity risk, servicing or administrative costs) associated with holding the financial asset for a period of time, and a profit margin.

Where the contractual terms introduce exposure to risk or variability of cash flows that are inconsistent with a basic lending arrangement, the related financial asset is classified and measured at FVTPL.

d. Investment securities

Investment securities include all securities classified as FVOCI and amortised cost. All investment securities are initially recorded at fair value and subsequently measured according to the respective classification.

Investment securities carried at amortised cost are measured using the effective interest method, and are presented net of any allowance for credit losses, calculated in accordance with the Group's policy for allowance for credit losses, as described below. Interest income, including the amortization of premiums and discounts on securities measured at amortised cost are recorded in interest income. Impairment gains or losses recognized on amortised cost securities are recorded in impairment charge for credit losses. When a debt instrument measured at amortised cost is sold, the difference between the sale proceeds and the amortised cost of the security at the time of the sale is recorded as a fixed income securities income in Net trading and foreign exchange income.

Debt securities carried at FVOCI are measured at fair value with unrealized gains and losses arising from changes in fair value included in fair value reserve in equity. Impairment gains and losses are included in impairment charge for credit losses and correspondingly reduce the accumulated changes in fair value included in fair value reserve. When a debt instrument measured at FVOCI is sold, the cumulative gain or loss is reclassified from fair value reserve to net trading and foreign exchange income.

Equity securities carried at FVOCI are measured at fair value. Unrealized gains and losses arising from changes in fair value are recorded in fair value reserve and not subsequently reclassified to profit or loss when realized. Dividends from FVOCI equity securities are recognized in other operating income.

The Group accounts for all securities using settlement date accounting and changes in fair value between the trade date and settlement date are reflected in income for securities measured at FVTPL, and changes in the fair value of securities measured at FVOCI between the trade and settlement dates are recorded in OCI except for changes in foreign exchange rates on debt securities, which are recorded in net trading and foreign exchange income.

e. Fair value option

A financial instrument with a reliably measurable fair value can be designated as FVTPL (the fair value option) on its initial recognition even if the financial instrument was not acquired or incurred principally for the purpose of selling or repurchasing. The fair value option can be used for financial assets if it eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise from measuring assets or liabilities, or recognizing related gains and losses on a different basis (an "accounting mismatch"). The fair value option can be elected for financial liabilities if: (i) the election eliminates an accounting mismatch; (ii) the financial liability is part of a portfolio that is managed on a fair value basis, in accordance with a documented risk management or investment strategy; or (iii) there is an embedded derivative in the financial or non-financial host contract and the derivative is not closely related to the host contract. These instruments cannot be reclassified out of the FVTPL category while they are held or issued.

Financial assets designated as FVTPL are recorded at fair value and any unrealized gains or losses arising due to changes in fair value are included in net trading and foreign exchange income.

Financial liabilities designated as FVTPL are recorded at fair value and fair value changes attributable to changes in the Group's own credit risk are recorded in OCI. Own credit risk amounts recognized in OCI are not reclassified subsequently to net income. The remaining fair value changes not attributable to changes in the Group's own credit risk are recorded in Other operating income. Upon initial recognition, if it is determined that presenting the effects of own credit risk changes in OCI would create or enlarge an accounting mismatch in net income, the full fair value change in debt securities designated as FVTPL is recognized in net income. To make that determination, the Group assess whether to expect that the effects of changes in the liability's credit risk will be offset in profit or loss by a change in the fair value of another financial instrument measured at FVTPL. Such an expectation is based on an economic relationship between the characteristics of the liability and the characteristics of the other financial instrument. The determination is made at initial recognition and is not reassessed. To determine the fair value adjustments on debt instruments designated at FVTPL, the Group calculates the present value of the instruments based on the contractual cash flows over the term of the arrangement by using our effective funding rate at the beginning and end of the period.

Financial assets are reclassified when and only when the business model for managing those assets changes. The reclassification takes place from the start of the first reporting period following the change. Such changes are expected to be very infrequent and none occurred during the period.

f. Loans

Loans are debt instruments recognized initially at fair value and are subsequently measured in accordance with the classification of financial assets policy provided above. Loans are carried at amortised cost using the effective interest method, which represents the gross carrying amount less allowance for credit losses.

Interest on loans is recognized in interest income using the effective interest method. The estimated future cash flows used in this calculation include those determined by the contractual term of the asset and all fees that are considered to be integral to the effective interest rate. Also included in this amount are transaction costs and all other premiums or discounts.

3 Significant accounting policies - Continued

3.27 IFRS 9: Financial instruments - Continued

f. Loans - continued

Fees that relate to activities such as originating, restructuring or renegotiating loans are deferred and recognized as Interest income over the expected term of such loans using the effective interest method. Where there is a reasonable expectation that a loan will be originated, commitment and standby fees are also recognized as interest income over the expected term of the resulting loans using the effective interest method. Otherwise, such fees are recorded as other liabilities and amortised into Other operating income over the commitment or standby period.
Impairment losses on loans are recognized at each reporting date in accordance with the three-stage impairment model outlined below.

g. Allowance for credit losses

An allowance for credit losses (ACL) is established for all financial assets, except for financial assets classified or designated as FVTPL and equity securities, which are not subject to impairment assessment. Assets subject to impairment assessment include loans, overdrafts, debt securities, interest receivable and other financial assets. These are carried at amortised cost and presented net of ACL on the Consolidated Statement of Financial Position. ACL on loans is presented in Allowance for credit losses - loans and advances. ACL on debt securities measured at FVOCI is presented in profit or loss with the corresponding entry to other comprehensive income. ACL on other financial assets is calculated using the 'general approach' and presented in 'Allowance for impairmenton account receivable'.

Off-balance sheet items subject to impairment assessment include financial guarantees and undrawn loan commitments. For all other off-balance sheet products subject to impairment assessment, ACL is separately calculated and included in Other Liabilities – Provisions.
The Credit Conversion Factor (CCF) is used to determine the credit exposure equivalent of the off balance sheet exposure including the open or undrawn limits. The undrawn portion of the approved limit that would have been drawn at the time of default are converted to exposure at default(EAD), this is in addition to the other off-balance sheet exposures like bonds and guarantees, letters of credit etc. In determining the CCF, the bank considers the behavioural cash flow, collateral type and the collateral value securing the facility, time to discover and prevent further drawing during the time of increased credit risk, time lag to convert the collateral to cash, the recovery strategy and cost are also considered. CCF is applied on the off balance exposures to determine the EAD and then subsequently the expected credit loss (ECL).

The ACL is measured at each reporting date according to a three-stage expected credit loss impairment model which is based on changes in credit risk of financial assets since initial recognition:

1) Performing financial assets:
• Stage 1 – From initial recognition of a financial asset to the reporting date, where the asset has not experienced a significant increase in credit risk relative to its initial recognition, a loss allowance is recognized equal to the credit losses expected to result from defaults occurring over the 12 months following the reporting date. Interest income is calculated on the gross carrying amount of these financial assets.

2) Underperforming financial assets:
• Stage 2 – Following a significant increase in credit risk relative to the initial recognition of the financial asset, a loss allowance is recognized equal to the credit losses expected over the remaining lifetime of the asset. Interest income is calculated on the gross carrying amount of these financial assets.

3) Impaired financial assets
• Stage 3 – When a financial asset is considered to be credit-impaired, a loss allowance is recognized equal to credit losses expected over the remaining lifetime of the asset. The Stage 3 expected credit loss impairment model is based on changes in credit quality since initial recognition. Interest revenue is calculated based on the carrying amount of the asset, net of the loss allowance, rather than on its gross carrying amount.
The ACL is a discounted probability-weighted estimate of the cash shortfalls expected to result from defaults over the relevant time horizon. For loan commitments, credit loss estimates consider the portion of the commitment that is expected to be drawn over the relevant time period. For financial guarantees, credit loss estimates are based on the expected payments required under the guarantee contract.

Increases or decreases in the required ACL attributable to purchases and new originations, derecognitions or maturities, and remeasurements due to changes in loss expectations or stage migrations are recorded in Provision for credit losses. Write-offs and recoveries of amounts previously written off are recorded against ACL.
The ACL represents an unbiased estimate of expected credit losses on our financial assets as at the reporting date. Judgment is required in making assumptions and estimations when calculating the ACL, including movements between the three stages and the application of forward looking information. The underlying assumptions and estimates may result in changes to the provisions from period to period that significantly affect our results of operations.

h. Measurement of expected credit losses

Expected credit losses are based on a range of possible outcomes and consider all available reasonable and supportable information including internal and external ratings, historical credit loss experience, and expectations about future cash flows. The measurement of expected credit losses is based primarily on the product of the instrument's probability of default (PD), loss given default (LGD) and exposure at default (EAD) discounted to the reporting date. Stage 1 estimates project PD, LGD and EAD over a maximum period of 12 months while Stage 2 estimates project PD, LGD and EAD over the remaining lifetime of the instrument.
An expected credit loss estimate is produced for each individual exposure. Relevant parameters are modelled on a collective basis using portfolio segmentation (corporates, retail, public sector and commercial) that allows for appropriate incorporation of forward looking information.
Expected credit losses are discounted to the reporting period date using the effective interest rate.

3 Significant accounting policies - Continued

3.27 IFRS 9: Financial instruments - Continued

i. Expected life

For instruments in Stage 2 or Stage 3, loss allowances reflect expected credit losses over the expected remaining lifetime of the instrument. For most instruments, the expected life is limited to the remaining contractual life.

An exemption is provided for certain instruments with the following characteristics: (a) the instrument includes both a loan and undrawn commitment component; (b) the Group has the contractual ability to demand repayment and cancel the undrawn commitment; and (c) the Group's exposure to credit losses is not limited to the contractual notice period. For products in scope of this exemption, the expected life may exceed the remaining contractual life and is the period over which exposure to credit losses is not mitigated by normal credit risk management actions. This period varies by product and risk category and is estimated based on the historical experience with similar exposures and consideration of credit risk management actions taken as part of regular credit review cycle. Products in scope of this exemption include credit cards, overdraft balances and certain revolving lines of credit. Determining the instruments in scope for this exemption and estimating the appropriate remaining life based on our historical experience and credit risk mitigation practices requires significant judgment.

j. Assessment of significant increase in credit risk

The assessment of significant increase in credit risk requires significant judgment. The Bank's process to assess changes in credit risk is based on the use 'backstop' indicators. Instruments which are more than 30 days past due may be credit-impaired. There is a rebuttable presumption that the credit risk has increased significantly if contractual payments are more than 30 days past due; this presumption is applied unless the bank has reasonable and supportable information demonstrating that the credit risk has not increased significantly since initial recognition.

The following are considered as exception:

1. Outstanding obligation is a result of an amount being disputed between the bank and obligor where the dispute is not more than 90 days.
2. Outstanding obligation is an insignificant amount compared to the total amount due. Any amount not more than 10% of the total amount due is considered insignificant. Only applicable where there is no significant increase in credit risk and analysed on a case by case basis.

The assessment is generally performed at the instrument level and it is performed at least on quarterly basis. If any of the factors above indicate that a significant increase in credit risk has occurred, the instrument is moved from Stage 1 to Stage 2. The assessments for significant increases in credit risk since initial recognition and credit-impairment are performed independently at each reporting period. Assets can move in both directions through the stages of the impairment model. After a financial asset has migrated to Stage 2, if it is no longer considered that credit risk has significantly increased relative to initial recognition in a subsequent reporting period, it will move back to Stage 1 after 90 days.

Similarly, an asset that is in Stage 3 will move back to Stage 2 if it is no longer considered to be credit-impaired after 90 days. An asset will not move back from stage 3 to stage 1 until after a minimum of 180 days, if it is no longer considered to be credit impaired.

For certain instruments with low credit risk as at the reporting date, it is presumed that credit risk has not increased significantly relative to initial recognition. Credit risk is considered to be low if the instrument has a low risk of default, and the borrower has the ability to fulfil their contractual obligations both in the near term and in the longer term, including periods of adverse changes in the economic or business environment.

k. Use of forward-looking information

The measurement of expected credit losses for each stage and the assessment of significant increase in credit risk considers information about past events and current conditions as well as reasonable and supportable projections of future events and economic conditions. The estimation and application of forward-looking information requires significant judgment.

The PD, LGD and EAD inputs used to estimate Stage 1 and Stage 2 credit loss allowances are modelled based on the macroeconomic variables (or changes in macroeconomic variables) that are most closely correlated with credit losses in the relevant portfolio. Each macroeconomic scenario used in the expected credit loss calculation includes a projection of all relevant macroeconomic variables applying scenario weights. Macroeconomic variables used in the expected credit loss models include GDP growth rate, foreign exchange rates, inflation rate, crude oil prices and population growth rate.

The estimation of expected credit losses in Stage 1 and Stage 2 is a discounted probability-weighted estimate that considers a minimum of three future macroeconomic scenarios. The base case scenario is based on macroeconomic forecasts published by relevant government agencies. Upside and downside scenarios vary relative to our base case scenario based on reasonably possible alternative macroeconomic conditions. Additional and more severe downside scenarios are designed to capture material non-linearity of potential credit losses in portfolios. Scenario design, including the identification of additional downside scenarios, occurs at least on an annual basis and more frequently if conditions warrant.

Scenarios are designed to capture a wide range of possible outcomes and weighted according to the best estimate of the relative likelihood of the range of outcomes that each scenario represents. Scenario weights take into account historical frequency, current trends, and forward-looking conditions and are updated on a quarterly basis. All scenarios considered are applied to all portfolios subject to expected credit losses with the same probabilities.

The assessment of significant increases in credit risk is based on changes in probability-weighted forward-looking lifetime PD as at the reporting date, using the same macroeconomic scenarios as the calculation of expected credit losses.

l. Definition of default

A default is considered to have occurred with regard to a particular obligor when either or both of the following events have taken place.

• The Bank considers that the obligor is unlikely to pay its credit obligations in full, without recourse by the bank to actions such as realising security (if held).

• The obligor is past due more than 90 days on any material credit obligation to the bank (principal or interest). Overdrafts will be considered as being past due once the customer has breached an advised limit or been advised of a limit smaller than current outstanding.

• Interest payments equal to 90 days or more have been capitalized, rescheduled, rolled over into a new loan (except where facilities have been reclassified).

The elements to be taken as indications of unlikeliness to pay include:

- The Bank sells the credit obligation at a material credit-related economic loss.

3 Significant accounting policies - Continued

3.27 IFRS 9: Financial instruments - Continued

l. Definition of default - continued

- The bank consents to a distressed restructuring of the credit obligation where this is likely to result in a diminished financial obligation caused by the material forgiveness, or postponement, of principal, interest or (where relevant) fees.
- The Bank has filed for the obligor's bankruptcy or a similar order in respect of the obligor's credit obligation to the banking group.

The following are considered as exceptions:

a. Outstanding obligation is a result of an amount being disputed between the bank and obligor where the dispute is not more than 150 days;

b. In the case of specialized loans, default is defined as where the obligor is past due more than 180 days on any material credit obligation to the bank (principal or interest). This is consistent with CBN guidelines on IFRS 9. In addition, it is consistent with the Bank's historical default pattern on this category of loans. The specialized loans to which this is applicable are Project Financing, Object Financing, Income Producing Real Estate, Commercial Real Estate and Mortgage Loans;

c. Outstanding obligation is an insignificant amount compared to the total amount due. Any amount not more than 10% of amount due is considered insignificant. Only applicable where there is no significant increase in credit risk and analysed on a case by case basis.

d. Exposure is still in default due to a new debit when the initial debit has been cleared. Usually occurs when the debit that initiated the initial days past due has been paid but the days past due continues to reflect a debit.

m. Credit-impaired financial assets (Stage 3)

Financial assets are assessed for credit-impairment at each reporting date and more frequently when circumstances warrant further assessment. Evidence of credit-impairment may include indications that the borrower is experiencing significant financial difficulty, probability of bankruptcy or other financial reorganization, as well as a measurable decrease in the estimated future cash flows evidenced by the adverse changes in the payments status of the borrower or economic conditions that correlate with defaults.

A loan is considered for transfer from stage 2 to stage 1 where there is significant improvement in credit risk and from stage 3 to stage 2 (declassified) where the facility is no longer in default. Factors that are considered in such backward transitioning include the following:

i) Declassification of the exposure by all the licensed private credit bureaux or the credit risk management system;

ii) Improvement of relevant credit risk drivers for an individual obligor (or pool of obligors);

iii) Evidence of full repayment of principal or interest.

Generally, the above are to represent an improvement in credit risk to warrant consideration for a backward transition of loans. Where there is evidence of significant reduction in credit risk, the following probationary periods should apply before a loan may be moved to a lower stage (indicating lower risk):

Transfer from Stage 2 to 1:- 90 days

Transfer from Stage 3 to 2:- 90 days

Transfer from Stage 3 to Stage 1:- 180 days

When a financial asset has been identified as credit-impaired, expected credit losses are measured as the difference between the asset's gross carrying amount and the present value of estimated future cash flows discounted at the instrument's original effective interest rate. For impaired financial assets with drawn and undrawn components, expected credit losses also reflect any credit losses related to the portion of the loan commitment that is expected to be drawn down over the remaining life of the instrument.

When a financial asset is credit-impaired, interest ceases to be recognised on the regular accrual basis, which accrues income based on the gross carrying amount of the asset. Rather, interest income is calculated by applying the original effective interest rate to the amortised cost of the asset, which is the gross carrying amount less the related ACL.

Following impairment, interest income is recognized on the unwinding of the discount from the initial recognition of impairment.

n. Write-off of loans

Loans and the related ACL are written off, either partially or in full, when there is no realistic prospect of recovery. Where loans are secured, they are generally written off after receipt of any proceeds from the realization of collateral. In circumstances where the net realizable value of any collateral has been determined and there is no reasonable expectation of further recovery, write off may be earlier.

Written-off loans are derecognised from the Bank's books. However, the Group continues enforcement activities on all written-off loans until full recovery is achieved or such time when it is objectively evident that recovery is no longer feasible.

o. Modifications

The credit risk of a financial asset will not necessarily decrease merely as a result of a modification of the contractual cash flows. If the contractual cash flows on a financial asset have been renegotiated or modified and the financial asset was not derecognised, the Bank assesses whether there has been a significant increase in the credit risk of the financial by comparing:

(1) the risk of a default occurring at the reporting date (based on the modified contractual terms); and

(2) the risk of a default occurring at initial recognition (based on the original, unmodified contractual terms).

A modification will however lead to derecognition of existing loan and recognition of a new loan i.e. substantial modification if:

• the discounted present value of the cash flows under the new terms, including any fees received net of any fees paid and discounted using the original effective interest rate, is at least 10 per cent different from the discounted present value of the remaining cash flows of the original financial asset.

The following will be applicable to modified financial assets:

• The modification of a distressed asset is treated as an originated credit-impaired asset requiring recognition of life-time ECL after modification.

• The cumulative changes in lifetime expected credit losses since initial recognition is recognized as a loss allowance for purchase or originated credit-impaired financial asset at the reporting date.

• The general impairment model does not apply to purchased or originated credit-impaired assets.

3 Significant accounting policies - Continued

3.27 IFRS 9: Financial instruments - Continued

The following situations (qualitative) may however not lead to a derecognition of the loan:
• Change in interest rate arising from a change in MPR which is the benchmark rate that drives borrowing rates in Nigeria;
• Change in financial asset's tenor (increase or decrease);
• Change in installment amount to higher or lower amount;
• Change in the annuity repayment pattern, for example, from monthly to quarterly, half-yearly or yearly
• Change in the applicable financial asset fee
Modification gain or loss is included as part of allowance for credit loss for each financial year.

p. Classification and measurement of financial liabilities

The Group recognizes financial liabilities when it first becomes a party to the contractual rights and obligations in the relevant contracts.

Under IFRS 9, financial liabilities are either classified as financial liabilities at amortised cost or financial liabilities at FVTPL.

The Group classifies its financial liabilities as measured at amortised cost, except for:
i. Financial liabilities at FVTPL: this classification is applied to derivatives, financial liabilities held for trading (e.g. short positions in the trading booking) and other financial liabilities designated as such at initial recognition. A financial liability is classified as held for trading if it is a part of a portfolio of specific financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking.

Gains or losses from financial liabilities designated at fair value through profit or loss are presented partially in other comprehensive income (the amount of change in the fair value of the financial liability that is attributable to changes in the Group's own credit risk, which is determined as the amount that is not attributable to changes in market conditions that give rise to market risk) and partially profit or loss (the remaining amount of change in the fair value of the liability). This is unless such a presentation would create, or enlarge, an accounting mismatch, in which case the gains and losses attributable to changes in the Group's credit risk are also presented in profit or loss;
ii. Financial guarantee contracts and commitments.
Financial liabilities that are not classified at fair value through profit or loss are measured at amortised cost using the effective interest rate method. Financial liabilities measured at amortised cost are deposits from banks or customers, borrowings, and subordinated liabilities.

q. De-recognition of financial instruments

The Group derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire or when the Group transfers the right to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial assets are transferred, or has assumed an obligation to pay those cash flows to one or more recipients, subject to certain criteria.
Any interest in transferred financial assets that is created or retained by the Group is recognised as a separate asset or liability.

The Group may enter into transactions whereby it transfers assets , but retains either all risks and rewards of the transferred assets or a portion of them. If all or substantially all risks and rewards are retained, then the transferred assets are not derecognised. In transactions where the Group neither retains nor transfers substantially all the risks and rewards of ownership of a financial asset, it derecognises the asset if control over the asset is lost.
The rights and obligations retained in the transfer are recognised separately as assets and liabilities as appropriate. In transfers where control over the asset is retained, the Group continues to recognise the asset to the extent of its continuing involvement, determined by the extent to which it is exposed to changes in the value of the transferred asset.
The Group derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.28 IFRS 16 Leases

At contract inception the Group assesses at whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group adopts a single measurement approach and recognizes right to use of assets and lease liability at commencement date of a lease contract.

Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets.

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including insubstance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Group is the lessor

When assets are leased to a third party under finance lease terms, the present value of the lease income is recognised as a receivable. The difference between the gross receivable and the present value of the receivable is recognised as unearned finance income. Lease income is recognised over the term of the lease using the net investment method (before tax), which reflects a constant periodic rate of return.

3.29 Changes in accounting policies

Except for the following new standards, the Group has consistently applied the accounting policies as set out in Notes 3.1 - 3.29 to all periods presented in these consolidated and separate financial statements. The Group has adopted this new standard with initial date of application of January 1, 2021.

Amendments to IFRS 7, IFRS 9 and IAS 39: Interest Rate Benchmark Reform - Phase 2

'The Group has adopted the use of this new standard on annual periods beginning on or before January 1 2021.

In August 2020, the Board issued amendments that complement those issued in 2019 and focus on the effects of the interest rate benchmark reform on a company's financial statements that arise when, for example, an interest rate benchmark used to calculate interest on a financial asset is replaced with an alternative benchmark rate.

The Phase 2 amendments, Interest Rate Benchmark Reform—Phase 2, address issues that might affect financial reporting during the reform of an interest rate benchmark, including the effects of changes to contractual cash flows or hedging relationships arising from the replacement of an interest rate benchmark with an alternative benchmark rate.

The Group has undertaken preliminary exposure analysis of LIBOR-linked instruments on its statement of financial position and is currently in the process of determining the pricing methodology to adopt upon LIBOR discontinuation. The Group plans to complete this, not later than December 2021.

3.30 Standards and interpretations issued/amended but not yet effective

The standards listed below have been issued or amended by the IASB but are yet to become effective for annual periods beginning on or after 1 January 2021. The Group has not applied the following new or amended standards in preparing these consolidated and separate financial statements as it plans to adopt these standards at their respective effective dates. Commentaries on these new standards/amendments are provided below.

a) IFRS 17 - Insurance Contracts

IFRS 17 was issued in May 2017 and applies to annual reporting periods beginning on or after 1 January 2023. The new IFRS 17 standard establishes the principles for the recognition, measurement, presentation and disclosure of Insurance contracts within the scope of the Standard. It also requires similar principles for reinsurance contracts held and issued investment contracts with discretionary participation features. The standard brings a greater degree of comparability and transparency about an insurer's financial health and the profitablity of new and in-force insurance business.

IFRS 17 introduces a general measurement model that measures groups of insurance contracts based on fulfilment cash flows (comprising probability-weighted current estimates of future cash flows and an explicit entity-specific adjustment for risk) and a contractual service margin. The premium allocation approach (PAA) is a simplified measurement model that may be applied when certain conditions are fulfilled. Under the PAA approach, the liability for remaining coverage will be initially recognised as the premiums, if any, received at initial recognition, minus any insurance acquisition cash flows. The general measurement model has specific modifications applicable to accounting for reinsurance contracts, direct participating contracts and investment contracts with discretionary participation features.

This standard does not impact the Group in anyway as the Bank and its subsidiary companies do not engage in insurance business.

(b) Amendment to IAS 1

This amendment relates to classification of Liabilities as Current or Non-current which will provide a more general approach to the classification of liabilities under IAS 1 based on the contractual arrangements in place at the reporting date.

The amendment only affect the presentation of liabilities in the statement of financial position and not the amount or timing of recognition of any asset, liability income or expenses, or the information that entities disclose about those items. The amendment will

- clarify that classification of liabilities as current or non-current should be based on rights that are in existence at the end of the reporting date,
- clarify that classification is unaffected by expectations about whether an entity will exercise its right to defer settlement of a liability and make clear that settlement refers to the transfer to the counterparty of cash, equity instruments, other assets or services.

The Group does not anticipate early adopting the standard and is currently evaluating its impact.

The amendments are effective for annual reporting periods beginning on or after 1 January 2023 and are to be applied retrospectively. Earlier application is permitted.

(c) Property, Plant and Equipment: Proceeds before Intended Use – Amendments to IAS 16

The standard prohibits entity to deduct proceeds from selling items produced while bringing that asset to the location and condition necessary for it to be capable of operating in the manner intended by management from the cost of an item of property, plant and equipment . Entities are however allowed to recognize the proceeds from selling such items, and the cost of producing those items, in profit or loss.

The Group does not anticipate early adopting the standard and is currently evaluating its impact.

The amendment is effective for annual periods beginning on or after 1 January 2022. Early adoption is permitted

(d) Onerous Contracts – Costs of Fulfilling a Contract – Amendments to IAS 37

The standard specify that the cost of fulfilling a contract comprises the costs that relate directly to the contract. the standard further states that costs that relate directly to a contract can either be incremental costs of fulfilling that contract (examples would be direct labour, materials) or an allocation of other costs that relate directly to fulfilling contracts (an example would be the allocation of the depreciation charge for an item of property, plant and equipment used in fulfilling the contract).

The Group does not anticipate early adopting the standard and is currently evaluating its impact.

The amendment is effective for annual periods beginning on or after 1 January 2022. Early adoption is permitted

3.31 Rounding of amounts

All amounts disclosed in the financial statements and notes have been rounded off to the nearest million Nigerian Naira (NGN) unless otherwise stated.

4 Financial Risk Management

4.1 Introduction and overview

Given the scale and scope of its operations as well as the diversity of the geographies within which it operates, United Bank for Africa Plc (UBA Plc) has adopted an enterprise wide, integrated approach to risk management. The key objectives are as follow:

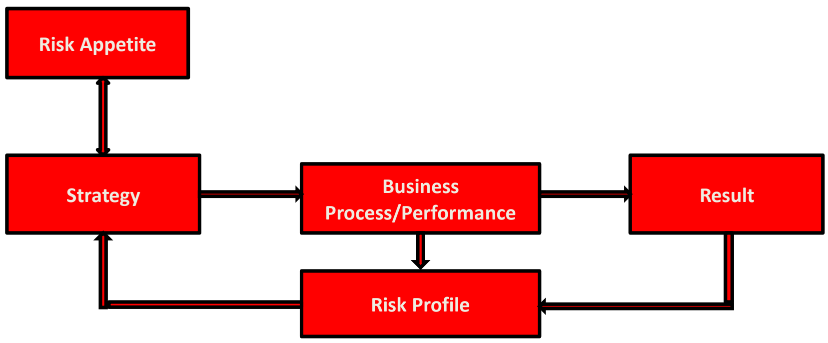
1. meet and exceed best practice global standards as defined by local and international regulatory bodies. We intend to achieve this by adhering to the principles of the Basel II Accords as adopted by the Central Bank of Nigeria (CBN);
2. ensure sustainable profitability and enterprise value protection by maintaining growth within appropriate risk-control boundaries; and
3. enhance corporate governance by involving the Board and Senior Management in setting the tone for the risk management agenda.

The key elements of the ERM framework are intended to enhance risk identification, measurement, control and reporting.

(a) Risk Management Strategy

UBA's risk management strategy is based on an embedded risk management process from the strategy formulation level to the business unit decision making. The strategic risk management objectives include:

- Evaluation of the strategic risks faced by the Group in the continuously evolving environment;
- Allocate resources in line with strategic objectives and risks;
- Determine the tolerable risk profile and formulate the acceptable risk appetite for the Group;
- Establish adequate risk management and internal control systems to support the business and the risk appetite; and
- Establish proper feedback mechanism as input into the strategic risk management process.



(b) Risk Management Culture

There is a commitment to ensuring that risk management is enshrined as a culture in the Group, from the Board of Directors to the individual business unit. There is considerable effort to infuse the risk/reward evaluation in the decision making process in order to ensure that there is proper assessment of risk dimension in process design, performance appraisal, limit establishment, portfolio creation, monitoring activities and audit process. The aim is also to encourage a culture of constant re-evaluation of risk profile and prompt risk mitigation action , where required.

In order to do this, there is proper dissemination of information and policies, development of frameworks, and staff training to ensure that all staff are adequately aware of their roles in the risk management process of the Group. As part of the risk culture, we aim to ensure the following:

- General understanding and uniform application of risk management principles;
- Strong and visible commitment from senior management;
- Clearly defined responsibility and accountability;
- Central oversight of risk management across the enterprise;
- Central oversight of corporate governance across the enterprise;
- Ownership of risk management is at all levels; and
- Clearly defined risk appetite.

4 Financial Risk Management

4.1 Introduction and risk profile (continued)

(c) Role and responsibilities

The key players in the risk management framework and their responsibilities are as follows:

Board of Directors

The ultimate responsibility for risk management in UBA lies with the Board of Directors. The responsibilities of the Board with respect to risk management include, but are not limited to:

- Ensuring an appropriate corporate governance framework is developed and operated;
- Providing guidelines regarding the management of risk elements in the Group;
- Approving Group risk management policies;
- Determination of the Group's risk appetite;
- Ensuring that management controls and reporting procedures are satisfactory and reliable;
- Approving large credit exposures beyond the limit of the Board Credit Committee; and
- Approving capital demand plans based on risk budgets.

Board Committees

The Board of Directors has established various Board-level risk committees, to support its risk oversight roles and responsibilities. These committees review and advise on numerous risk matters requiring Board approvals.

The Board Risk Management Committee has direct oversight for the Bank's overall risk management framework. The Board Credit Committee considers and approves large exposure underwriting decisions within its authority and recommends those above its limit to the Board for consideration. The Board Audit Committee assists the Board with regard to internal controls, audit assessments and compliance matters.

A list of various Board committees and their assigned responsibilities is contained in the corporate governance report.

Management Committees

Key Management Committees include:

(i) Executive Management Committee (EMC)

The EMC is responsible for the following, among others, and is accountable to the Board:

- Executing strategy once approved by the Board;
- Overall performance of the Group;
- Managing the Group's risks; and
- Day-to-day oversight for the Group.

All non-credit product approvals must go to the EMC which shall review and approve or recommend for approval to the appropriate Board Committees in line with the Bank's advised Approval Limits. Above the EMC approval limits, Non-Credit products are approved by the Board's Finance and General Purpose Committee (F&GPC).

All new business activity irrespective of capital commitment must be approved by the F & GPC through the EMC.

(ii) Executive Credit Committee (ECC)

The Committee's main objective is to develop and maintain a sound credit risk portfolio for the Group and to oversee the development and deployment of credit risk practices across the Group. They also:

- Set frameworks and guidelines for credit risk management for the Group
- Review and recommend all Credit related policies for the Group to the BCC for approval
- Monitor implementation and compliance with credit policy paying particular attention to the following:
    - Credit concentration
    - Credit portfolio quality
    - Review credit requests and recommend those above its limit to BCC for approval
    - Ensure the Group's Non Performing Loans portfolio is within the acceptable ratio
    - Review all major credit audit issues with a view to adopting learning points for enhancement to the credit process

(iii) Group Asset and Liability Committee

The Group Asset and Liability Committee (GALCO), is a sub-committee of the EMC whose decisions are reported to the Finance & General Purpose Committee. GALCO has responsibility for managing UBA Group's financial position as well as traded and non-traded market risks.

4 Financial Risk Management

4.1 Introduction and risk profile (continued)

In playing this role, GALCO does the following:-

- Recommend balance sheet (financial position) management policies, frameworks and procedures to the Board Risk Management Committee through EMC for approval
- Recommend Treasury policies, frameworks and procedures to the Finance and General Purpose Committee (F & GPC) through EMC for approval
- Manage the Group's balance sheet and ensure compliance with regulatory and statutory ratios and requirements
- Develop an optimal structure of the Group's balance sheet to optimize risk-reward through a review of:
    - Liquidity Gap Analysis
    - Maximum Cumulative Outflow (MCO)
    - Stress Test
    - Wholesale Borrowing Guidelines
    - Contingency Liquidity Plan
- Review Liquidity, Interest Rate and Currency Risks and approve risk mitigation proposals subject to ratification by EMC
- Set pricing strategies for the Group on assets and liabilities (pool rate, asset and/or liability composition) subject to ratification by EMC

(iv) Criticized Assets Committee

The Criticized Assets Committee is a management committee which reviews Past Due Obligations (PDOs) and

- Develops the framework to reduce the Group's portfolio of risk assets on watch-list as well as delinquent accounts
- Monitor implementation of strategies developed for recoveries and reduction of loan delinquencies
- Ratifies proposed classification of accounts and provisioning levels
- Recommends write-offs for approval through the EMC to the Board

(v) Group Risk Management Committee

The responsibilities of the Group Risk Management Committee are as follows:

(a) To support the EMC in the discharge of its risk management responsibilities which includes but is not limited to the management of risk, determining risk tolerance levels, risk appetite, risk monitoring, risk assurance and risk disclosures for the Group.
(b) To review, assess and make recommendations on the integrity and adequacy of the overall risk management function of the Group.
(c) To review, assess and make recommendations to the Executive Management Committee regarding policies relating to risk management.
(d) To review risk limits and periodic risk and compliance reports and make recommendations to the Executive Management Committee.
(e) Recommend risk approval limits to Executive Management Committee.
(f) To review and recommend on an annual basis the update of the risk management policies, frameworks and procedures of the Group.
(g) Advise Executive Management Committee on any emerging risks that the Group is or could be exposed to and recommend mitigation actions.
(h) Monitor overall risk management framework to ensure that the framework is uniformly applied in all the entities in the Group.
(i) Review IT Risk Management and make recommendations in accordance with the risk appetite of the Group.
(j) Monitor the Basel II Accord Capital Framework implementation and compliance program in the Group.
(k) Periodic review of the Risk Assets Portfolio and Limits in line with internal and regulatory benchmarks.
(l) Review and recommend yearly Risk Management staffing model and manpower development programs.

Group Chief Risk Officer

The Group Chief Risk Officer has oversight for the effective and efficient governance of all risk functions in the Group. He is responsible for development and implementation of Group's risk management frameworks, policies and processes across the entire risk spectrum.

(d) Central Risk Management Functions

Each risk function including Credit, Market, Operational and IT Risk has direct responsibility for the development and management of risk management activities. The responsibilities of divisional functions with respect to risk include:

- Develop and maintain policies, frameworks and risk management methodologies
- Provide guidance on the management of risks and ensure implementation of risk policies and strategies
- Provide recommendations for improvement of risk management
- Provide consolidated risk reports to the various Board and management committees such as EMC, ECC and/or Board of Directors
- Provide assurance that risk management policies and strategies are operating effectively to achieve the Group's business objectives.

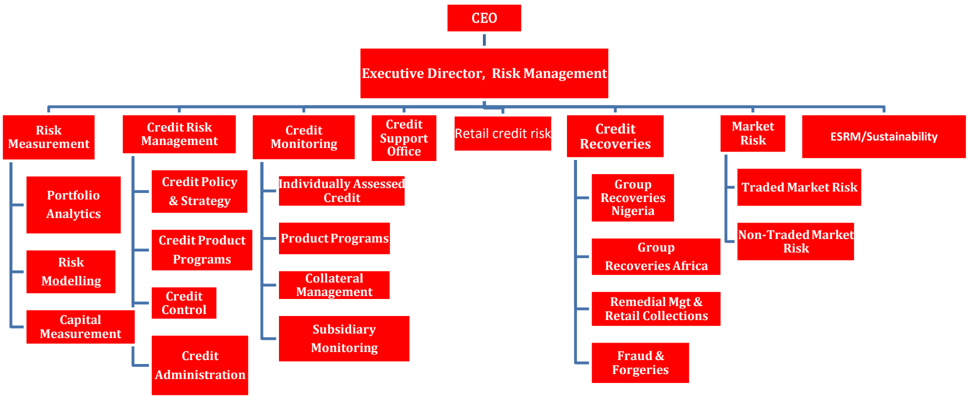
At a strategic level, our risk management objectives are as follows:

- To identify, assess, control, report and manage the Group's material risks and optimize risk/return decisions
- To ensure business growth plans are properly supported by effective risk infrastructure
- To manage the risk profile to ensure that specific financial deliverables remain possible under a range of adverse business conditions

(e) Risk Management Structure

The Group has in place an independent Risk Management Directorate which is essential to UBA's growth and earnings sustainability.

In response to the dynamic risk environment, the risk management structure has been flattened to ensure increased oversight and improved responsiveness.



(f) Risk Management Policies

The principal risk policies cover the Group's main risk types, assigning responsibility for the management of specific risks and setting out requirements for control frameworks for all risk types. Fundamental to the delivery of the Group's risk management objectives are a series of methodologies that allow it to measure, model, price, stress-test, mitigate and report the risks that arise from its activities.

(i) Risk Appetite

A key responsibility of the Board is the determination of the organization's risk appetite. This is codified in a Risk Appetite framework which considers the level of risk that the Group is willing to take in pursuit of its business objectives. This is expressed as the Group's appetite for earnings volatility across all businesses from a credit, marketing and liquidity risk perspective.

Risk appetite is institutionalized by establishing scale of activities through clearly defined target market criteria, product risk acceptance criteria, portfolio limits as well as risk-return requirements.

(ii) Approval Authority

The Board of Directors also set internal approval limits which are reviewed from time to time as the circumstances of the Group demands. These are at all times guided by maximum regulatory limit as applicable.

(iii) Risk concentration

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographical region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Group's performance to developments affecting a particular industry or geographical location.

In order to avoid excessive concentrations of risk, the Group's policies and procedures include specific guidelines to focus on maintaining a diversified portfolio. Identified concentrations of credit risks are controlled and managed accordingly. The Group applies a concentration risk management framework that sets exposure limits as a function of capital across all dimensions of its asset portfolio including geography, sector, obligor, product etc. This is closely monitored to ensure diversification of risk.

4.2 Credit Risk

(a) Overview

Credit risk is the potential for financial loss resulting from the failure of a borrower or counterparty to honor its financial or contractual obligations. Credit represent a significant part of the overall risk exposure of the Group and is largely represented by the loans and advances on the books of the Group. The Group has several policies and frameworks in place for managing credit risk across the Group.

(i) Credit Risk Management (CRM)

The Credit Risk Management division acts as the custodian of Group credit policies and recommends reviews based on regulatory changes and other developments in the operating environment. It develops and implements the Group credit risk management framework, as well as a portfolio management strategy towards achieving a diversified, high quality asset mix to minimize delinquencies.

In addition, CRM ensures appropriate control measures are taken in the documentation and administration of approved loans.

(ii) Credit Risk Governance

The Board through Board Credit Committee (BCC) is responsible for the overall governance of credit risk and the management of the credit portfolio of the Group. It reviews and recommends credit policies to the Board. The Executive Credit Committee (ECC) sets frameworks and guidelines for credit risk management for the Group and reviews and recommends for approval to the BCC all credit related policies for the Group. ECC monitors implementation and compliance with credit policy paying particular attention to the following:

a. Credit concentration

b. Credit portfolio performance

c. Credit quality

With regards to approval of credit facilities, the ECC approves facilities that are above the limit of the GMD, while the BCC approves credit facilities that are above the limit of the ECC. The Board of Directors is the overall approving authority, approving credit facilities that are above the limit of the BCC.

(iii) Credit Monitoring

Credit monitoring runs as a separate group of risk management to improve oversight of loan performance. Its primary function is to continuously monitor the bank's loan portfolio to ensure ongoing portfolio performance and achievement of portfolio quality targets. Credit Monitoring ensures all loans are booked in line with the Group's policy. They also identify exceptions which may prevent the loan from being paid in a timely manner. Observed Credit exceptions are escalated for possible resolution, sanction implementation and management attention. The group takes proactive steps to ensure follow up on accounts showing signs of delinquency.

(iv) Credit Concentration Management

The Group has a Credit Concentration Risk Management policy which provides a framework within which lending decisions can be made so as to ensure an adequate level of diversification of the Group's credit portfolio. The policy provides risk-based limits that restrict lending activities to within the Group's desired risk appetite and tolerance.

The Group ensures that:

· It manages its portfolio by ensuring adequate diversification across industries, segments and jurisdictions to maintain high portfolio quality and liquidity

· Provides risk based concentration limits to ensure that exposures to single obligors, sectors and countries are contained within acceptable risk appetite.

(v) Credit Risk Measurement

In measuring credit risk of loans and advances to various counterparties, the Group considers the credit worthiness and financial capacity of the obligor to pay or meet contractual obligations, current exposures to the counter party/obligor and its likely future developments, credit history of the counterparty/obligor; and the likely recovery ratio in case of default obligations-value of collateral and other ways out. Our credit exposure comprises wholesale and retail loans and advances and debt securities. The Group's policy is to lend principally on the basis of our customers' repayment capacity through quantitative and qualitative evaluation. However we strive to ensure that our loans are backed by collateral to reflect the risk of the obligors and the nature of the facility.

In the estimation of credit risk, the Group estimates the following parameters:

- Probability of Default (PD)
- Loss Given Default(LGD)
- Exposure at Default

Probability of Default

This is the probability that an obligor or counterparty will default over a given period, usually one year. To measure expected credit loss, we develop a 12-month PD or equivalent (used in Stage 1 provisioning) and a lifetime PD or equivalent (used for Stages 2 and 3 provisioning). The PD is used to reflect the current expectation of default and considers available reasonable and supportive forwarding-looking information.

Loss Given Default

LGD is defined as the portion of the loan determined to be irrecoverable at the time of loan default (1 – recovery rate). Our methods for estimating LGD includes both quantitative and qualitative factors which are adjusted for forward looking information to measure lifetime expected credit losses.

Exposure at default

This represents the amount that is outstanding at the point of default. Its estimation includes the drawn amount and expected utilization of the undrawn commitment at default.

(vi) Environmental & Social Risk Management/Sustainability (ESRM/Sustainability)

The Group puts Environmental, Social and Governance(ESG) considerations as part of its overall strategy. This is achieved by integrating environmental and social standards into the Group's business operations and activities. The overall objective is to foster sustainable practices that focus on preserving the tripple bottom line of people, profit and the planet. Our Environmental, Social and Governance framework is based on local and global standards such as the the Nigerian Sustainable Banking Principles(NSBP), IFC Performance Standards, Equator Principles, the Sustainable Development Goals(SDGs). We are also guided by the World Bank good international industry practices as well as host country's local environmental laws and standards. The Group's sustainability targets are emcapsulated in UBA Foudation's broader focus on Environment, Education and Economic Empowerment.

(vii) General Risk Rating Process

The Group adopts a two-dimensional approach to the assessment of credit risk in the Risk Rating Process for all obligors.

Obligors are assigned an Obligor Risk Rating (ORR) while a Facility Risk Rating (FRRs) is assigned to facilities. However certain obligors, retail and commercial loans applicants that do not have a risk rating, must access credit through product programmes while those that have credit ratings can access through the individually assessed credit window. Scoring system is used for consumer loans whereby loans that achieve a predetermined minimum score are approved.

Inputs used to determine obligor risk ratings (ORRs) are derived based on quantitative and qualitative factors. The quantitative factors are primarily based on a metrics that uses information on the obligor's financial position while the qualitative factors include:

- Management quality
- Industry risks
- Company profile
- Economic factors

The integrity of the Group's portfolio management process is dependent on accurate and timely risk ratings. Deterioration in credit risks is quickly identified and communicated to facilitate prompt action. The rating is reviewed on a periodic basis and this is reflected in the management of such portfolio. The default also leads to prevention of further drawdown while steps are taken to recover the outsanding balance and/or realise the collateral.

Deterioration in credit risk are identified based on factors such as

- Ratings downgrade
- Missed payments
- Non-compliance with loan covenants
- Deterioration ot quality/value ot collateral

(viii) Credit Rating of Counterparty/Obligor

All risk rating processes are reviewed and validated periodically to ensure relevance to business realities, and relate to loans and advances to customers, loans and advances to banks, financial assets held for trading and investment securities. External ratings may also be obtained where such is available. The Risk Rating buckets and definitions are as highlighted below:

UBA Risk Buckets and Definition

Description	Rating Bucket	Range Of Scores	Risk Range	Risk Range (Description)
Extremely Low Risk	AAA	1.00 - 1.99	90% - 100%	
Very Low Risk	AA	2.00 – 2.99	80% - 89%	Low Risk Range
Low Risk	A	3.00 – 3.99	70% - 79%	
Acceptable Risk	BBB	4.00 – 4.99	60% - 69%	Acceptable Risk Range
Moderately High Risk	BB	5.00 – 5.99	50% - 59%	
High Risk	B	6.00 – 6.99	40% - 49%	High Risk Range
Very High Risk	CCC	7.00 – 7.99	30% - 39%	
Extremely High Risk	CC	8.00 – 8.99	0% - 29%	Unacceptable Risk Range
High Likelihood of Default	C	9.00 – 9.99	Below 0%	
Default	D	Above 9.99	Below 0%	

The risk ratings are a primary tool in the review and decision making in the credit process. The Group does not lend on unsecured basis to obligors that are below investment grade (BB and above). The Group will not lend to obligors in the unacceptable risk range.

4 Financial Risk Management

4.2 Credit risk (continued)

(ix) Remedial Management Process

This process is managed by the Group Remedial & Recovery Division (GRRD). Depending on the severity of classification, the Group undertakes remedial corrective action geared towards ensuring performance of weak credits. Early attention, including substantive discussions with borrowers, is required to correct deficiencies.

Remedial process covers the evaluation, analysis or restructuring of credit facilities for existing PDOs. It may include new extensions of credit and/or restructuring of terms. Some of the possible actions are summarised as follows:

- Rate/Payment modification or longer-term payment relief - adjusting interest rates or payment frequency;
- Ageing/Extension: Modifying the length of the loan;
- Cash Out: Refinancing a loan at a higher principal amount in order to get additional funds for other uses;
- Short Sale – Loan is discounted to prevent imminent foreclosure; and
- Deed in lieu – Voluntary conveyance of interest in property to the Bank

The process calls for full information gathering, together with financial and risk analysis leading up to the approval decision. Analysis and standards vary according to business product, market, transaction characteristics and environmental issues. In all cases, we strive to achieve good judgment, in ensuring that all relevant issues have been addressed in each situation.

(x) Work out and recovery

The Remedial Management & Credit Recovery Division ("RMCRD") is the collections arm of Credit Risk Management that evaluates, monitors and supervises the re-structuring, repayments and collections of all past due obligations that have been prudential classified and show early warning signs of default. The division has a three level governance structure:

Level 1 is an oversight and supervisory function performed by the Divisional Head through the Regional Heads;

Level 2 is a supervisory and management function performed by the Regional Heads through the Zonal Heads; and

Level 3 is an operational function performed by the Zonal Head in conjunction with the Recovery/Remedial officers from the regional bank offices.

RMCRD maintains effective governance and control over its entire process and adopts a standard methodology consisting of five steps.

Risk Management and Credit Recovery Division methodology

Steps	Activities
1. Identification	Identification of past due obligations due for recovery, collections and remedial action
	Identification of strategies to be adopted
	Identification of the least cost alternative of achieving timely collections within resource constraints
2. Assessment & Implementation	Accurate review and professional assessment of credit records
	Implementation of identified strategies
	Update the database
3. Management & Monitoring	Proffer professional work-out situations to aid prompt settlement
	Review identified strategies for adequacy in managing past due obligations
	Proffer solutions that will aid the credit decision making process
4. Controlling	Establish key control processes, practices and reporting requirements on a case-by-case basis.
	Ensure work-out situations align with UBA's strategic framework
	Proffer solutions that will aid the credit decision making process
5. Reporting	Communicate learning points from case profiles on past due obligations in order to improve the quality of lending practices
	Report cases of imminent crystallisation of default
	Present remedial actions to reduce and/or mitigate default

4 Credit risk (continued)

(b) Credit risk Exposure

(i) Maximum exposure to credit risk before collateral held or other credit enhancements

The following table shows the maximum exposure to credit risk by class of financial asset. The Group's maximum exposure to credit risk is represented by the net carrying amounts of the financial assets with the exception of financial and other guarantees issued by the Group for which the maximum exposure to credit risk is represented by the maximum amount the Group would have to pay if the guarantees are called on.

Credit risk exposures relating to on-balance sheet assets are as follows:

	Maximum exposure Group		**Maximum exposure Bank**	
In millions of Nigerian Naira	**Jun. 2021**	**Dec. 2020**	**Jun. 2021**	**Dec. 2020**
Cash and bank balances				
Current balances with banks	410,960	291,225	253,104	176,665

	1,353,709	**858,829**	**674,805**	**358,673**
Bonds and guarantee exposure to total exposure	22%	20%	42%	46%
Letters of credit exposure to total exposure	78%	80%	58%	54%

Credit risk exposures relating to loan commitment are as follows:

	Group		**Bank**	
In millions of Nigerian naira	**Jun. 2021**	**Dec. 2020**	**Jun. 2021**	**Dec. 2020**
Loan commitment to corporate entities and others				
Term Loan	87,499	95,030	87,499	95,030
	87,499	**95,030**	**87,499**	**95,030**

There are no loan commitments to individuals.

The credit risk exposure as at period end is representative of the average exposure in the period.

4.2 Credit risk (continued)

(b) Credit risk Exposure(continued)

(ii) Credit concentration - location

The Group monitors concentrations of credit risk by sector, geographic location and industry. Concentration by location for loans and advances is measured based on the location of the Group entity holding the asset, which has a high correlation with the location of the borrower. Concentration by location for investment securities is measured based on the location of the issuer of the security. The amounts stated are net of impairment allowances.

An analysis of concentrations of credit risk at the reporting date is shown below:

4.2 Credit risk (continued)

(c) Credit Quality

The Group manages the credit quality of its financial assets using internal credit ratings. It is the Group's policy to maintain accurate and consistent risk ratings across the credit portfolio. This facilitates focused management of the applicable risks and the comparison of credit exposures across all lines of business, geographic regions and products. The rating system is supported by a variety of financial analytics, combined with processed market information to provide the main inputs for the measurement of counterparty risk. All internal risk ratings are tailored to the various categories and are derived in accordance with the Group's rating policy. The attributable risk ratings are assessed and updated regularly.

The credit quality of the Group's loans and advances are categorized as follows:

Stage 1 Loans and Advances:

These are loans and advances that have not deteriorated significantly in credit quality since initial recognition or that have low credit risk (where the optional simplification is applied) at the reporting date.

Stage 2 Loans and Advances:

These are loans and advances that have deteriorated significantly in credit quality since initial recognition but do not have objective evidence of a credit loss event.

Stage 3 Loans and Advances:

These are loans and advances that have objective evidence of a credit loss event. Stage 3 allocation is driven by either the identification of credit impairment or an exposure being classified as defaulted.

Impaired loans and securities

Impaired loans and securities are loans and securities for which the Group determines that it is probable that it will be unable to collect all principal and interest due according to the contractual terms of the loan / securities agreement(s). These are loans and securities specifically impaired.

Loans with renegotiated terms

The contractual terms of a loan may be modified for a number of reasons including changing market conditions, customer retention and other factors not related to a current or potential credit deterioration of the customer. The Group renegotiates loans to customers to maximise collection opportunities and minimise the risk of default. The revised terms of renegotiated facilities usually include extended maturity, changing timing of interest payments and amendments to the terms of the loan agreement. As at 30 June 2021, the carrying amount of loans with renegotiated terms was N453.3 billion (December 2020 : N453.0billion). There are no other financial assets with renegotiated terms as at 30 June 2021 (December 2020: nil).

Impairment assessment under IFRS

The Group assesses its impairment for the purpose of IFRS reporting using the 'forward-looking' Expected Credit Loss (ECL) model in line with provisions of *IFRS 9 - Financial Instrument* .

The Group records an allowance for expected losses for all loans and other debt financial assets not held at FVPL, together with loan commitments and financial guarantee contracts. The allowance is based on the expected credit losses associated with the probability of default in the next twelve months unless there has been a significant increase in credit risk since origination, in which case, the allowance is based on the probability of default over the life of the asset.

The measurement of expected credit losses is based on the product of the instrument's probability of default (PD), loss given default (LGD), and exposure at default (EAD), discounted to the reporting date using the effective interest rate.

The ECL model has three stages. The Group recognises a 12-month expected loss allowance on initial recognition (stage 1) and a lifetime expected loss allowance when there has been a significant increase in credit risk since initial recognition (stage 2). Stage 3 requires objective evidence that an asset is credit-impaired and then a lifetime expected loss allowance is recognised.

Credit Quality (continued)

(i) The table below shows the credit quality by class of asset for all financial assets exposed to credit risk.

30 June 2021	**Group**				**Bank**

(d) Statement of Prudential Adjustments

Provisions under prudential guidelines are determined using the time based provisioning prescribed by the Revised Central Bank of Nigeria (CBN) Prudential Guidelines and the Central Banks of the foreign subsidiaries' regulations. This is at variance with the expected credit loss model required by IFRS under IFRS 9. As a result of the differences in the methodology/provision, there will be variances in the impairments allowances required under the two methodologies.

Paragraph 12.4 of the revised Prudential Guidelines for Deposit Money Banks in Nigeria stipulates that Banks would be required to make provisions for loans as prescribed in the relevant IFRS Standards when IFRS is adopted.

However, Banks would be required to comply with the following:

Provisions for loans recognized in the profit and loss account should be determined based on the requirements of IFRS. However, the IFRS provision should be compared with provisions determined under prudential guidelines and the expected impact/changes in general reserves should be treated as follows:

• Prudential Provisions is greater than IFRS provisions; the excess provision resulting therefrom should be transferred from the general reserve account to a "regulatory risk reserve".

• Prudential Provisions is less than IFRS provisions; IFRS determined provision is charged to the statement of comprehensive income. The cumulative balance in the regulatory risk reserve is thereafter reversed to the general reserve account.

As at 30 June 2021, the difference between the Prudential provision and IFRS impairment was N69.81 billion for the Group (December 2020: N45.50 billion) and N47.25 billion for the Bank (December 2020: N45.77billion). This will require a transfer of N24.31 bilion from retained earning to regulatory risk reserve for the Group and N1.48 billion from retained earnings to regulatory risk reserve for the Bank. (December 2020: transfer of N5.10 billion from regulatory credit risk reserve to retained earnings for the Group and N9.22 billion transfer from retained earnings to regulatory credit risk reserve for the Bank) as the regulatory risk reserve is higher than the difference between the allowance for credit losses determined in line with IFRS 9 as at period end and provisions for credit and other known losses under the prudential guidelines issued by the Central Bank of Nigeria (CBN) and the Central Banks of foreign subsidiaries.

Transfer from/to regulatory risk reserve	(24,313)	5,098	(1,477)	(9,219)

4.2 Credit risk (continued)

(e) Credit Collateral

The Group holds collateral against loans and advances to customers in the form of mortgage interests over property, other registered securities over assets, and guarantees. Estimates of fair value are based on the value of collateral assessed at the time of borrowing and updated periodically. Collateral generally is not held over loans and advances to banks except when securities are held as part of reverse repurchase and securities borrowing activity. Collateral is usually also not held against investment securities.

Irrespective of how well a credit proposal is structured, a second way out in form of adequate collateral coverage for all loans is a major requirement in order to protect the bank from incurring loan losses due to unforeseen events resulting from deterioration of the quality of a loan.

Consequently, the Group issues appropriate guidelines for acceptability of loan collateral from time to time. These articulate acceptable collateral in respect of each credit product including description, required documentation for perfection of collateral and minimum realizable value.

All items pledged as security for loan facilities are insured with the Bank noted as the first loss payee.

Some of the collaterals acceptable to the Bank under appropriate documentations are briefly described as follows:

1. Cash

Cash is the most liquid and readily realizable form of security and the most acceptable to the Bank. Furthermore, cash pledged must be in the same currency as the credit and also in the possession of the Bank either in savings or a deposit account.

2. Treasury bills/certificates

Treasury bills/certificates are acceptable as bank security provided the instruments are purchased through the Bank and have been properly assigned to the bank. Since payments are channeled through the Bank on due dates, realization of the security is relatively easy.

3. Stock and shares

Stocks and shares of reputable quoted companies are acceptable collateral securities. Unquoted shares are usually not acceptable as collaterals.

4. Legal Mortgage

The Bank takes and perfects its interest in acceptable property that are transferred by the obligor as collateral for loan, such that in case of any default by the obligor, the Bank would not require a court order before realizing the security. Location restrictions are however specified in respect of landed property.

5. Debenture

The Bank accepts to take a charge on both current and non-current assets of a borrower by a debenture which is a written acknowledgement of indebtedness by a company usually given under its seal and also sets out the terms for repayment of interest and principal of the credit. A debenture is executed by an obligor in favour of the Bank and it gives a specific or general charge on the company's assets, both present and future.

6. Life Insurance Policies

Generally, life policy with a reputable insurance company approved by the Bank and free of restrictions adverse to the Bank's interest is an acceptable security for loan. This could be an endowment policy or whole life policy though the Bank prefers the endowment policy.

7. Guarantees

The Bank accepts guarantees from well rated banks as well as acceptable parties (guarantors) as additional comfort and security for her credits. A guarantee is a written promise by one person called the guarantor or surety to be answerable for the debt, default or miscarriage of another person called principal debtor.

UBA also accepts unconditional insurance credit and performance bonds of first class insurance companies and also the guarantee of the Federal and State Governments. Other guarantees must however be supported by tangible assets for them to become valid for lending.

4.2 Credit risk (continued)

(e) Credit Collateral (continued)

An estimate of the fair value of collateral and other security enhancements held against loans and advances to customers is shown below:

	2,554,975	**2,380,491**	**1,812,536**	**1,572,850**

* Other collateral are mainly domiciliation of payments (sales, invoices, salaries, allowances and terminal benefits), lien on shipping documents, corporate guarantees and similar collaterals.

Other financial assets comprising cash and bank balances (including balances with central banks), financial assets held for trading, investment securities and accounts receivable are not secured. The Group's investment in government securities and its cash and balances with central banks are not considered to require collaterals given their sovereign nature.

Repossessed collateral

During the period, the Group took possession of property amounting to Nil (2020: N2.755 billion) held as collateral against certain loans. These collaterals have been realised and used in offsetting the affected customers' outstanding obligations.

Details of collaterals realised during the period is as shown below:

4.3 Liquidity risk

(a) Overview

Liquidity risk arises in the general funding of the Group's activities and in the management of position. Liquidity risk is the risk that the Group does not have sufficient financial resources to meet maturing obligations or can only access these financial resources at excessive cost. Liquidity risk includes both the risk of being unable to fund assets at appropriate maturities and rates and the risk of being unable to liquidate an asset at a reasonable price and in an appropriate time frame. To limit this risk, management has arranged for diversified funding sources in addition to its core deposit base, and adopted a policy of managing assets with liquidity in mind and monitoring future cash flows and liquidity on a daily basis. The Group remains well funded with strong liquidity position.

(i) Liquidity Risk Management

In terms of measuring, managing and mitigating liquidity mismatches, UBA Group focuses on two types of liquidity risk, namely funding liquidity risk and market liquidity risk. Funding liquidity risk is the risk that UBA Group is unable to meet its payment obligations as they fall due. These payment obligations could emanate from depositor withdrawals or the inability to roll over maturing debt or meet contractual commitments to lend. Market liquidity risk is the risk that the group will be unable to sell assets without incurring an unacceptable loss, in order to generate cash required to meet payment obligations under a stress liquidity event. The Group manages its liquidity prudently in all geographical locations and for all currencies. The principal uncertainties for liquidity risk are that customers withdraw their deposits at a substantially faster rate than expected, or that asset repayments are not received on the expected maturity date. To mitigate these uncertainties, our funding base is diverse and largely customer-driven, while customer assets are of short tenor. In addition we have contingency funding plans including a portfolio of liquid assets that can be realised if a liquidity stress occurs, as well as ready access to wholesale funds under normal market conditions. We have significant levels of marketable securities, including government securities that can be monetised or pledged as collateral in the event of a liquidity stress.

Contingency funding plans are reviewed and approved annually. They provide a broad set of Early Warning Indicators, an escalation framework and a set of management actions that could be effectively implemented by the appropriate level of senior management in the event of a liquidity stress. A similar plan is maintained within each country.

(ii) Liquidity Risk Governance

The board of directors retains ultimate responsibility for the effective management of liquidity risk. Through the Group Risk Management Committee (GRMC), the board has delegated its responsibility for the management of liquidity risk to the Group Assets & Liability Committee (GALCO). GALCO is the responsible governing management body that monitors liquidity management metrics. Liquidity in each country is managed by the country ALCO within pre-defined liquidity limits and in compliance with Group liquidity policies and practices, as well as local regulatory requirements. Group Market Risk management and Group Treasury are responsible for proactively managing liquidity risk at an operational, tactical and strategic level.

(iii) Liquidity Risk Measurement

There are two measures used across the Group for managing liquidity risk namely: liquidity ratio mechanism which is a statutory requirement from most Central Banks in order to protect third party deposits, and funding gap analysis of assets and liabilities. The funding gap analysis is applied through the use of a maturity ladder by assessing all the bank's cash inflows against outflows to identify the potential for net shortfalls or net funding requirements (i.e. a cumulative net excess or deficit of funds) at selected maturity dates. The maturity ladder is monitored on a day -to-day basis and stress testing is undertaken on a quarterly basis by applying different scenarios to the maturity ladder and assessing the bank's funding requirements under each scenario. All UBA businesses and subsidiaries also construct their maturity ladder and compile reports based on agreed assumptions which is consolidated into a global report for Group ALCO review. The country treasurer for each subsidiary/Group Head Balance Sheet Management also documents the appropriate actions and includes the same into the Contingency Funding Plan (CFP) for implementation.

Liquidity stress testing is also performed for each of UBA Group's major entities and operating subsidiaries. Stress testing and scenario analyses are intended to quantify the potential impact of a liquidity event on the financial and liquidity position, and to identify viable funding alternatives that can be utilized. These scenarios include assumptions about significant changes in key funding sources, market triggers (such as credit ratings), potential uses of funding and political and economic conditions in certain countries. These conditions include expected and stressed market conditions as well as Company-specific events.

(b) Liquidity ratios

The key measure used by the Group for managing liquidity risk is the ratio of net liquid assets to deposits from customers. For this purpose, net liquid assets are considered as including cash and cash equivalents and investment grade debt securities for which there is an active and liquid market less any deposits from banks, debt securities issued, other borrowings and commitment maturing within one month.

The liquidity position of the Group remained strong in the course of the period and materially above the minimum liquidity ratio requirement of 30% prescribed by the Central Bank of Nigeria which is UBA Plc's lead regulator. Details of the Bank's ratio of net liquid assets to deposits and customers at the reporting date and during the reporting period were as follows:

	Bank Jun. 2021	Bank Dec. 2020
At period end	44.66%	44.30%
Average for the period	35.68%	35.83%
Maximum for the period	50.34%	50.12%
Minimum for the period	30.56%	30.02%

(c) Analysis of financial assets and liabilities by remaining contractual maturities

The tables below show the undiscounted cash flow on the Group's financial liabilities and on the basis of the earliest possible contractual maturity. The Gross nominal inflow/outflow disclosed in the table is the contractual, undiscounted cash flows on the financial liabilities or commitments, except for derivatives assets and liabilities which are stated at their fair values.

The Group's expected cash flows on some financial assets and financial liabilities vary significantly from the contractual cash flows. Demand and savings deposits are expected to remain stable or increase, while unrecognised loan commitments are not expected to be drawn down immediately.

4.4 Market risk

(a) Overview

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as interest rates, foreign exchange rates and equity prices. The Group classifies exposures to market risk into either trading or non-trading portfolios and manages each of these portfolios separately. The trading portfolios comprise positions arising from market-making and warehousing of customer derived positions while non-trading portfolios comprise positions that primarily arise from the interest rate management of our retail and commercial banking assets and liabilities as well as financial instruments designated as FVOCI and amortised cost.

(i) Market Risk Management

The objective of market risk management in UBA is to ensure that all significant market risks are identified, measured, and managed in a consistent and effective manner across the Group in order to stabilize earnings and capital and also to ensure that the Group carries out its affairs within acceptable parameters and in line with the market risk appetite.

Market risk achieves the above stated objective, through a mix of quantitative and statistical controls which covers the underlisted activities:

Market data collection and statistical analysis
Limit determination based on market volatility
Stop loss limit utilization monitoring
Position monitoring
New trading products risk assessment
P&L attribution analysis
Pricing model validation and sign off
Trading portfolio stress testing
Regulatory limit monitoring
Position data extraction and Internal limit monitoring
Contingency funding plan maintenance and testing
Risk profile reporting to GALCO.

The universal market risk factors in UBA Group are interest rates, foreign exchange rates and equity prices. The associated market risks are:

- Foreign currency risk; arising from changes in exchange rates
- Interest rate risk; arising from changes in yield curves and credit spreads
- Equity risk; arising from changes in in the prices of equities, equity indices and equity baskets.

(ii) Market Risk Governance

The Board of Directors is responsible for determining UBA Group's risk appetite and tolerance limits for all its market risk exposures. Senior management is responsible for supporting the Board in determining market risk appetite and tolerance limits as well as putting in place all requisite processes, procedures and tools to ensure proper implementation of a robust system for managing, monitoring and reporting market risk appetite. The Board through Board Risk Management Committee (BRMC) is responsible for the overall governance of market risk as well as defining the terms of reference and delegating responsibilities to both the Group Risk Management Committee (GRMC) and Group Asset & Liability Management Committee (GALCO). GALCO has Group oversight and is charged with ensuring that market risks are managed homogeneously in all areas of operation. Further to the above, oversight of market risk is vested in BRMC, GALCO and the Finance & General Purpose Committee (FGPC) while the day to day management rests with the Executive Director, Risk Management, Corporate Governance & Compliance. The Group Market Risk Division is not only responsible for the development of detailed risk management policies but is also involved in the day to day review of their implementation. The market risk management policies are usually validated / approved by the Board in accordance with the approval guidelines. Trading limits are approved by GALCO and F&GPC and ratified by the Board while exposures against these limits are monitored by market risk management team.

(iii) Market Risk Measurement

The Group's policy is that all trading activities are undertaken within the context of the approved Market Risk Management appetite and limits. Market Risk Management team is responsible for identifying, measuring, managing, monitoring and reporting market risk as outlined in market risk management policy and other related policies.

The Group uses limits, triggers, value at risk, earnings-at-risk, gap analyses and scenario analyses to measure and control the market risk exposures within its trading and banking books. The Group also performs regular stress tests on its banking and trading books.

(iv) Approach to Managing Market Risk in the Trading Book

The techniques used to ensure and control trading book market risk include limit monitoring, daily valuation of positions, Value at Risk (VaR), Backtesting, stop loss triggers, stress testing/sensitivity analysis etc.

Market Risk Limits: The Bank has put in place specific market risk limits and triggers (regulatory and in-house) to prevent undue risk exposure to the Group. Market risk limits are based on recommendations by GALCO and approved by the Board. Position limits, transaction size and portfolio volume limits are in place for each trading portfolio. UBA Group sets various limits for total market risk and specific foreign exchange, interest rate, equity and other price risks. All limits are reviewed at least annually, and more frequently if required, to ensure that they remain relevant given market conditions and business strategy. Compliance with limits is monitored independently on a daily basis by Group Market Risk and Internal Control. Limit excesses are escalated and approved under a delegated authority structure and reported to the GALCO. Excesses are also reported monthly to Group Risk Management Committee (GRMC) and quarterly to Board Risk Management Committee (BRMC).

Stop loss Triggers: Stop loss triggers are used to protect the profitability of the trading desk. They establish decision points to confirm the Group's tolerance for accepting trading risk losses on a cumulative basis. The triggers are monitored on a daily basis by market risk management team.

Daily Valuation Of Market Risk Positions: Mark to Market (MTM) for relevant products/positions is done in line with International Financial Reporting Standard (IFRS). All market risk financial instruments are categorized into:
1) Fair value through profit or loss(FVTPL) – valued on fair value accounting methodology and MTM daily.
2) Fair value through other comprehensive income(FVOCI) – valued on fair value accounting methodology and MTM monthly.
3) Amortised cost – This portfolio is not MTM because positions are held until maturity.

Marking-to-market is at least the daily valuation of positions at readily available close out prices that are sourced independently. Where marking-to-market is not possible, marking-to-model technique is employed. Marking-to-model is defined as any valuation which has to be benchmarked, extrapolated or otherwise calculated from a market input. Assets that must be marked-to-model either don't have a regular market that provides accurate pricing, or valuations rely on a complex set of reference variables and time frames. E.g. complex financial instruments and derivatives.

Stress Testing: Market risk management complements the VaR measurement by regular stress testing of market risk exposures to highlight the potential risk that may arise from extreme market events that are rare but plausible. Stress testing provides an indication of the potential losses that could occur under extreme but plausible market conditions including when longer holding periods may be required to exit positions. Consistent stress-testing methodology is applied to trading and non trading books. Stress testing methodology considers both historical market events and forward-looking scenarios. The stress testing scenarios include market and credit scenarios, portfolio specific scenarios and macro economic scenarios. Stress scenarios are regularly updated to reflect changes in risk profile and economic events.

Factor Sensitivities: Factor sensitivities are expressed as the change in the value of a position for a defined change in a market risk factor, such as a change in the value of Nigerian Government Treasury bill for a one hundred basis point change in interest rates. UBA Group's Market Risk Management, within the Risk organization, works to ensure that factor sensitivities are calculated and monitored for all material risks taken in the trading portfolios.

(v) Approach to Managing Market Risk in the Non-trading Portfolio

Market risk from non-trading portfolios stems from the potential impact of changes in interest rates and foreign exchange rates on UBA's net interest revenues, the changes in accumulated other comprehensive income (loss) from its investment portfolios and capital invested in foreign currencies.

The management of banking book related market risk exposures involves managing the potential adverse effect of interest rate movements on banking book earnings (net interest income and banking book MTM profit or loss) and economic value of equity. Market risk in the banking book arises as a result of the mismatch between the future yield on assets and their funding cost and also the different repricing characteristics of banking book assets and liabilities. UBA Group uses a variety of tools to track and manage this risk. These tools include;

- Re-pricing gap analysis
- Liquidity gap analysis
- Earnings-at-Risk (EAR)
- Sensitivity Analysis

(vi) Exposure to interest rate risk- non-trading portfolio

UBA Group's principal measure of risk to net interest revenue is interest rate exposure (IRE). This is the risk that changes in interest rates could have a negative impact on the Bank's margins, earnings and capital. The objective of the Bank's interest rate risk management is to ensure that earnings are stable and predictable over time. The Bank is exposed to interest rate risk through the interest-bearing assets and liabilities in its trading and banking books. Non-traded interest rate risk arises in the banking book from the provision of retail and wholesale (non-traded) banking products and services, as well as from certain structural exposures within the Group's financial position, mainly due to different repricing characteristics of banking book assets and liabilities.

Interest rate risk is managed principally through monitoring interest rate gaps and having pre-approved limits for re-pricing bands. There will always be a mis-match between maturing assets and maturing liabilities, and changes in interest rates means that the Net Interest Margin (NIM) is affected on a daily basis by maturing and re-pricing activities. This change is measured through calculation of Earnings at Risk or EaR on a portfolio over the life of its assets and liabilities. EaR is usually calculated at various levels of change to simulate the likely change in the course of normal business or the expected risk where there is an unusual market event.

GALCO has oversight for compliance with these limits and execution of gapping strategy is carried out by Group Treasury.

The management of interest rate risk against interest rate gap limits is supplemented by monitoring the sensitivity of the Group's financial assets and liabilities to various standard and non-standard interest rate scenarios.

In order to manage changes in interest rates effectively, the Group may modify pricing on new customer loans and deposits, purchase fixed rate securities, issue debt that is either fixed or floating or enter into derivative transactions that have the opposite risk exposures. UBA regularly assesses the viability of these and other strategies to reduce its interest rate risks and implements such strategies when it believes those actions are prudent.

(b) Interest rate risk

UBA Group's operations are subject to the risk of interest rate fluctuations to the extent that interest-earning assets (including investments) and interest-bearing liabilities mature or re-price at different times or in differing amounts. Risk management activities are aimed at optimising net interest income and maintaining market interest rate levels consistent with the group's business strategies.

The table below is a summary of the Group's interest rate gap position at the reporting date. All assets, liabilities and derivatives instruments are allocated to gap intervals based on either their repricing or maturity characteristics. The Group's assets and liabilities are included at carrying amount and categorised by the earlier of their contractual re-pricing or maturity dates. Assets and liabilities for which no identifiable contractual repricing or maturity dates exist are allocated to gap intervals based on behavioural profiling. Overall non-trading interest rate risk positions are managed by Group Treasury which uses investment securities, advances to other financial institutions (banks and discount houses) to manage the overall position arising from the Group's non-trading activities.

Interest rate sensitivity analysis of floating rate financial instruments

The tables below shows the impact of interest rate changes (increase / decrease) on the Group's floating-rate financial instrument portfolios and the effect on profit or loss. The sensitivity analysis is based on a conservative assumption of 50 basis point change on the instrument with other variables remaining constant and also assuming there is no asymmetrical movement in yield curve.

4.4 Market risk

(c) Exchange rate exposure limits

FCY sensitivity analysis on foreign exchange rate

Foreign exchange risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. Foreign exchange risk is primarily controlled via policies around trading limits. The Board and Group ALCO set limits on the level of exposure by currency and in aggregate for both overnight and intra day positions. These limits must be in line with regulatory Open Position Limit (OPL). Compliance with both internal limits and regulatory limits are monitored daily with zero tolerance for limit breaches. These limits include OPL, dealers' limit, overnight/intraday limits, maturity gap limits, management action trigger, product limits, counterparty limits and cross border limits.

The tables below show foreign currencies to which the Group had exposure at the end of the reporting period and the sensitivity of the Group's profit before tax and equity to changes in exchange rates. The analysis calculates the effect of reasonably possible movement of the foreign exchange rates against the Nigerian Naira (all other variables being constant) on profit or loss due to changes to the carrying amounts of the Group's foreign currency sensitive financial assets and liabilities. A negative amount in the table reflects a potential net reduction in profit, loss or equity, while a positive amount reflects a net potential increase. An equivalent decrease in each of the currencies below against the Nigerian Naira would have resulted in an equivalent but opposite impact.
For the purpose of disclosing the sensitivity analysis for foreign currency risk, the Group's foreign currency risk arising from the translation of its foreign operations are not taken into account even though they may have an impact on equity. This is because foreign currency risk can only arise on financial instruments denominated in a currency other than the functional currency in which they are measured and translation exposures arise from financial and non-financial items held by an entity with a functional currency different from the group's presentation currency.

The information disclosed on the net foreign currency (FCY) exposure is representative of the average exposure in the period. The Bank believes that for each foreign currency exposure, it is reasonable to assume 15% depreciation of the Naira holding all other variables constant.

5 Capital

The Bank maintains an actively managed capital base to cover risks inherent in the business and is meeting the capital adequacy requirements of local banking supervisors. The Group's lead regulator, the Central Bank of Nigeria (CBN) sets and monitors capital requirements for the Bank. The parent company and individual banking operations are directly supervised by the Central Bank of Nigeria (CBN) and the respective regulatory authorities in the countries in which the subsidiary banking operations are domiciled.

5.1 Capital management

The primary objectives of the Group's capital management policy are to ensure that the Group complies with externally imposed capital requirements and maintains strong credit ratings and healthy capital ratios in order to support its business and to maximise shareholder value. The Group manages its capital structure and makes adjustments to it according to changes in economic conditions and the risk of its activities. In order to maintain or adjust its capital structure, the Bank may adjust the amount of dividend payment to shareholders, return capital to shareholders or issue capital securities. Capital management is overseen by the Board of Directors who have overall responsibility for ensuring adequate capital is maintained for the Group.
The Group has a process of ensuring adequate capital is maintained and this process includes:

- Capital planning
- Prudent portfolio management
- Capital adequacy stress testing
- Contingency Planning

The objective of the capital management process is to:

- Adequately assess impairment losses and impact on capital impairment;
- Meet CBN's capital adequacy requirements
- Optimise the use and allocation of capital resources and align our target capital with our optimum capital structure

5.2 Regulatory capital

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders.
The group monitors regulatory capital using the capital adequacy ratio. This ratio is calculated as total regulatory capital divided by risk weighted assets. Total regulatory capital and risk weighted assets are calculated as shown in the table below.

The Central Bank of Nigeria sets and monitors capital requirements for the Bank. The parent company and individual banking operations are directly supervised by the Central Bank of Nigeria and the respective regulatory authorities in the countries in which the subsidiary banking operations are domiciled.

The Central Bank of Nigeria requires the Bank to maintain a prescribed ratio of total capital to total risk-weighted assets.

The Group's regulatory capital is split into two tiers:

Tier 1 capital includes ordinary share capital, share premium, retained earnings, translation reserve and non-controlling interests after deductions for goodwill and intangible assets, and other regulatory adjustments relating to items that are included in equity but are treated differently for capital adequacy purposes.

Tier 2 capital includes qualifying subordinated liabilities and the element of the fair value reserve relating to unrealised gains on financial instruments classified as FVOCI.

Various limits are applied to elements of the capital base. Elements of Tier 2 capital are limited to a maximum of one-third of Tier 1 capital, after making deductions of goodwill, deferred tax asset and other intangible assets but before deductions of investments.

Banking operations are categorised mainly as trading book or banking book, and risk-weighted assets are determined according to specified requirements that seek to reflect the varying levels of risk attached to assets and off-balance sheet exposures.

During the year, the Group's strategy, which was unchanged, was to maintain a strong capital base so as to retain investor, creditor and market confidence and to sustain future development of the business. The impact of the level of capital on shareholders' return is also recognised and the Group recognises the need to maintain a balance between the higher returns that might be possible with greater gearing and the advantages and security afforded by a sound capital position.

Capital adequacy ratio is the quotient of the capital base of the Bank and the Bank's risk weighted asset base. UBA Plc operates under an international banking authorization with a minimum regulatory capital of N50 billion and a minimum capital adequacy ratio of 16%. During the year, the Group complied with all external capital requirements.

The above capital adequacy computation is based on the Revised Basel II guidelines advised by the Central Bank of Nigeria effective 24 June 2015.

5.3 Capital allocation

The allocation of capital between specific operations and activities is to a large extent, driven by optimisation of the return achieved on the capital allocated. The amount of capital allocated to each operation or activity is based primarily upon the regulatory capital but in some cases the regulatory requirements do not reflect fully the varying degree of risk associated with different activities. In such cases the capital requirements may be flexed to reflect differing risk profiles, subject to the overall level of capital to support a particular operation or activity not falling below the minimum required for regulatory purposes.

Although maximisation of the return on risk-adjusted capital is the principal basis used in determining how capital is allocated within the Group to particular operations or activities, it is not the sole basis used for decision making. Account also is taken of synergies with other operations and activities, the availability of management and other resources, and the fit of the activity with the Group's longer term strategic objectives.

6 Fair value measurement

Fair values of financial instruments

The fair values of financial assets and financial liabilities that are traded in active markets are based on quoted market prices or dealer price quotations. For all other financial instruments, the Group determines fair values using other valuation techniques.
For financial instruments that trade infrequently and have little price transparency, fair value is less objective and requires varying degrees of judgment depending on liquidity, concentration, uncertainty of market factors, pricing assumptions and other risks affecting the specific instrument.

6.1 Valuation models

The Group measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements.

• Level 1: inputs that are quoted market prices (unadjusted) in active markets for identical instruments. The fair value of financial instruments traded in active markets is based on quoted market prices at the reporting date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the Group is the current bid price. These instruments are included in Level 1. Instruments included in Level 1 comprise primarily quoted equity and debt investments classified as trading securities or available for sale.

• Level 2: inputs other than quoted prices included within Level 1 that are observable either directly (i.e as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques in which all significant inputs are directly or indirectly observable from market data. The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. These valuation techniques maximize the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2. If one or more of the significant inputs is not based on observable market data, the instrument is included in Level 3.
Specific valuation techniques used to value financial instruments include:

• Quoted market prices or dealer quotes for similar instruments;

• The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows based on observable yield curves;

• The fair value of forward foreign exchange contracts is determined using forward exchange rates at the reporting date, with the resulting value discounted back to present value;

• Other techniques, such as discounted cash flow analysis, are used to determine fair value for the remaining financial instruments.

• Level 3: inputs that are unobservable. This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments.
Valuation techniques include net present value and discounted cashflow models, comparison with similar instruments for which market observable prices exist, Black-Scholes and polynomial option pricing models and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premia used in estimating discount rate, bond and equity prices, foreign currency exchange rates, equity and equity index prices and expected price volatilities and correlations.

The objective of valuation techniques is to arrive at a fair value measurement that reflects the price that would be received to sell the asset or paid to transfer the liability in an orderly transaction between market participants at the measurement date.

The Group uses widely recognized valuation models for determining the fair value of common and more simple financial instruments, such as interest rate and currency swaps that use only observable market data and require little management judgment and estimation. Observable prices or model inputs are usually available in the market for listed debt and equity securities, exchange-traded derivatives and simple over-the-counter derivatives such as interest rate swaps. Availability of observable market prices and model inputs reduces the need for management judgment and estimation and also reduces the uncertainty associated with determining fair values. Availability of observable market prices and inputs varies depending on the products and markets and is prone to changes based on specific events and general conditions in the financial markets. The Group's valuation methodology for securities uses a discounted cash flow methodology and dividend discount methodology. The methodologies are often used by market participants to price similar securities.

For more complex instruments, the Group uses proprietary valuation models, which are usually developed from recognized valuation models. Some or all of the significant inputs into these models may not be observable in the market, and are derived from market prices or rates or are estimated based on assumptions. Valuation models that employ significant unobservable inputs require a higher degree of management judgment and estimation in the determination of fair value. Management judgment and estimation are usually required for selection of the appropriate valuation model to be used, determination of expected future cash flows on the financial instrument being valued, determination of the probability of counterparty default and prepayments and selection of appropriate discount rates.

Fair value estimates obtained from models are adjusted for any other factors such as liquidity risk or model uncertainties, to the extent that the Group believes that a third party market participant would take them into account in pricing a transaction. Fair values reflect the credit risk of the instrument and include adjustments to take account of the credit risk of the Group entity and the counterparty where appropriate. For measuring derivatives that might change classification from being an asset to a liability or vice versa such as interest rate swaps, fair values take into account both credit valuation adjustment (CVA) and debit valuation adjustment (DVA) when market participants take this into consideration in pricing the derivatives.

Model inputs and values are calibrated against historical data and published forecasts and where possible, against current or recent observed transactions in different instruments and against broker quotes. This calibration process is inherently subjective and it yields ranges of possible inputs and estimates of fair value, and management judgment is required to select the most appropriate point in the range.

If the Group measures portfolios of financial assets and financial liabilities on the basis of net exposures to market risks, then it applies judgment in determining appropriate portfolio-level adjustments such as bid-ask spreads and relevant risk premiums.

6.2 Valuation framework

The Group has an established control framework with respect to the measurement of fair values. This framework includes an Investor Relations and Portfolio Investments Management Unit which is independent of front office management and reports to the Group Chief Financial Officer, and which has overall responsibility for valuations. There is also the Risk Measurement unit responsible for independent independently verifying the results of third party valuation. Specific controls include:

• Verification of observable pricing;
• Re-performance of model valuations;
• A review and approval process for new models and changes to models involving both Product Control and Group Market Risk;
• periodic calibration and back-testing of models against observed market transactions;
• Analysis and investigation of significant daily valuation movements; and
• Review of significant unobservable inputs, valuation adjustments and significant changes to the fair value measurement of level 3 instruments compared with the previous month, by a committee of senior Product Control and Group Market Risk personnel.

When third party information, such as broker quotes or pricing services, is used to measure fair value, the risk measurement unit assesses and documents the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of IFRS. This includes:

• Verifying that the broker or pricing service is approved by the Group for use in pricing the relevant type of financial instrument;
• Understanding how the fair value has been arrived at and the extent to which it represents actual market transactions;
• When prices for similar instruments are used to measure fair value, how these prices have been adjusted to reflect the characteristics of the instrument subject to measurement; and
• If a number of quotes for the same financial instrument have been obtained, then how fair value has been determined using those quotes.

6 Fair value measurement - continued

6.3 Financial instruments measured at fair value

The table below analyses financial instruments measured at fair value at the end of the reporting period, by the level in the fair value hierarchy into which the fair value measurement is categorised. The amounts are based on the values recognised in the statement of financial position. All fair value measurements are recurring.

The following table presents the changes in level 3 instruments during the year. Level 3 instruments are all investment securities (unquoted equities).

In millions of Nigerian Naira	**Group Jun. 2021**	**Group Dec. 2020**	**Bank Jun. 2021**	**Bank Dec. 2020**
Balance, beginning of year	123,756	108,408	122,819	107,818
Addition during the year	-	347	-	-
Gain recognised in other comprehensive income (under fair value gain on FVOCI)	(904)	10,875	(904)	10,875
Translation differences	1,919	4,126	1,919	4,126
Balance, end of year	124,771	123,756	123,834	122,819

Fair value measurement (continued)

(i) The fair value of the Group's equity investment in CSCS Limited was previously categorised as level 3 in the fair value hierarchy. This was because the shares were not listed on an exchange and there were no recent observable arm's length transactions in the shares. There were no transfers from level 2 to level 3 in 2021.

(ii) Level 2 fair value measurements

These prices are a reflection of the actual fair value of the investments, as transactions consummated under the OTC trades were arms length transactions. The Group's Level 2 derivative contracts were valued using interest rate parity method discounted for passage of time. Inputs to the valuation models are all based on market conditions existing at the end of each reporting period. These derivative contracts are not traded in active markets.

(iii) Level 3 fair value measurements - Unobservable inputs used in measuring fair value

All valuation processes and techniques are subject to review and approval by the Finance and General Purpose Committee of the Board of Directors. There was no change in the Group's valuation technique during the period.

The table below sets out information about significant unobservable inputs used as at 30 June 2021 in measuring financial instruments categorised as Level 3 in the fair value hierarchy:

Type of financial instrument	Fair value as at 30 June 2021 N'million	Fair value as at 31 December 2020 N'million	Valuation technique	Unobservable input	Range of estimates for unobservable inputs (30 June 2021)	Range of estimates for unobservable inputs (31 December 2020)	Relationship of unobservable inputs to fair value	
Unquoted equity securities	129,738	127,797	Income Approach (Discounted cashflow method)	Cost of equity	13.1% - 22.3%	12.7% - 17.5%	Significant increases in cost of equity, in isolation, would result in lower fair values. Significant reduction would result in higher fair values	
				Terminal growth rate	2.9% - 2.3%	1.7%-2.4%	Significant increases in terminal growth rate, in isolation, would result in higher fair values. Significant reduction would result in lower fair values	

Fair value measurement (continued)

(iv) Level 3 fair value measurements - Unobservable inputs used in measuring fair value (continued)

Significant unobservable inputs are developed as follows:

Discounted cashflow

The Group measures fair values using the fair value hierarchy, which reflects the significance of the inputs used in making the measurements. Level 3 fair value measurements, includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. The Discounted cash flow valuation model was used, necessitating the adoption of the following unobservable inputs:

I. The Group used the Capital Asset Pricing Model to determine the cost of equities for its various unquoted equities which were fair valued at year end.
II. The risk-free rate was determined using the yield on 20-year US treasury bond (for unquoted securities denominated in USD) and longest tenured Federal Government of Nigeria bond (for unquoted securities denominated in Nigerian naira).
III. Equity risk premium was determined using market returns obtained from Damodaran Online
IV. Beta estimates were obtained from Damodaran Online.
V. For Africa Finance Corporation valuation, Management's revenue forecasts for the years 2020 – 2024 was used to derive the free cashflow to equity, which was discounted within the discounted cash flow framework to arrive at fair value estimate

Dividend discount model

• The Group used the build-up approach to determine cost of equities for its various unquoted equities which were fair valued using dividend discount model at year end.
• The risk free rate was determined using the yield on the longest tenored sovereign bonds.
• The dividend growth rate was determined using the historical five years weighted average growth rate of dividends paid by the respective entities
• Equity risk premium were obtained from Damodaran Online (with specific focus on emerging markets data), adjusted for size premium.

(v) Level 3 fair value measurements - Effect of unobservable inputs on fair value measurement

The Group believes that its estimates of fair values are appropriate. However, the use of different methodologies or assumptions could lead to different measurements of fair value. For fair value measurements in Level 3, changing the cost of equity or terminal growth rate by a reasonable possible value, in isolation, would have the following effects on other comprehensive income for the period:

In millions of Nigerian Naira

Key Assumption	Effect on other comprehensive income (OCI)			
	Jun. 2021		Dec. 2020	
	5% Increase	5% Decrease	5% Increase	5% Decrease
Cost of Equity	(6,024)	6,622	(5,710)	6,325
Terminal Growth Rate	122	(122)	113	(113)

Fair value measurement - continued

6.4 Financial instruments not measured at fair value

Below are the methodologies and assumptions used to determine fair values for the above financial instruments which are not recorded and measured at fair value in the Group's financial statements. These fair values were calculated for disclosure purposes only.

i) Cash and bank balances

The carrying amount of cash and cash equivalents is a reasonable approximation of fair value.

ii) Loans and advances

Loans and advances are net of charges for impairment. To improve the accuracy of the valuation estimate for loans, homogenous loans are grouped into portfolios with similar characteristics. The estimated fair value of loans and advances represents the discounted amount of estimated future cash flows expected to be received. Expected cash flows are discounted at current market rates to determine fair value.

iii) Investment securities

The fair value for investment securities is based on market prices from financial market dealer price quotations. Where this information is not available, fair value is estimated using quoted market prices for securities with similar credit, maturity and yield characteristics.

iv) Other assets

The bulk of these financial assets have short (less than 3months) maturities and their amounts are a reasonable approximation of fair value.

v) Deposits from banks and customers

The estimated fair value of deposits with no stated maturity, which includes non-interest bearing deposits, is the amount repayable on demand. The estimated fair value of fixed interest-bearing deposits not quoted in an active market is based on discounted cash flows using interest rates for new debts with similar remaining maturity.

vi) Other liabilities

The carrying amount of financial liabilities in other liabilities is a reasonable approximation of fair value.

vii) Interest bearing loans and borrowings

The estimated fair value of fixed interest-bearing borrowings not quoted in an active market is based on discounted cash flows using the contractual interest rates for these debts over their remaining maturity.

7 Offsetting of financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position where the Group currently has a legally enforceable right to set-off the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. In the normal course of business, the Group may enter into various master netting agreements or other similar arrangements that do not meet the criteria for offsetting in the statement of financial position but still allow for the related amounts to be set off in certain circumstances.

The following table presents the recognized financial instruments that are offset, or subject to enforceable master netting arrangements or other similar agreements but not offset, as at the reporting date, and shows in the "Net" column what the impact would be on the Group's statement of financial position if all set off rights were exercised.

(a) Standard terms of electronic banking and similar payment transactions allow for net settlement of payments in the normal course of business.

8 Critical accounting estimates and judgments

The preparation of the Group's financial statements requires management to make judgements, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities, and the accompanying disclosures, as well as the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. In the process of applying the Group's accounting policies, management has made the following judgements and assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities. Existing circumstances and assumptions about future developments may change due to circumstances beyond the Group's control and are reflected in the assumptions if and when they occur. Items with the most significant effect on the amounts recognised in the financial statements with substantial management judgement and/or estimates are collated below.

These disclosures supplement the commentary on financial risk management (see note 4).

(a) Key sources of estimation uncertainty

(i) Measurement of the expected credit loss allowance

The measurement of the expected credit loss(ECL) allowance for financial assets measured at amortised cost and FVOCI is an area that requires the use of complex models and significant assumptions about future economic conditions and credit behaviour (e.g. the likelihood of customers defaulting and the resulting losses). Details of the inputs, assumptions and estimation methodologies used in measuring ECL are described in note 3.27.

A number of significant judgements are also required in applying the accounting requirements for measuring ECL, such as:

- Determining criteria for significant increase in credit risk;
- Choosing appropriate models and assumptions for the measurement of ECL;
- Establishing the number and relative weightings of forward-looking scenarios for each type of product/market and associated ECL; and
- Establishing groups of financial assets for the purposes of measuring ECL.

Detailed information about the judgements and estimates made by the Group in the above areas is set out in note 3.27.

(ii) Determining fair values

The determination of fair value for financial assets and liabilities for which there is no observable market price requires the use of techniques as described on the Group's valuation methodology have been made on note 6.1. For financial instruments that trade infrequently and have little price transparency, fair value is less objective, and requires varying degrees of judgment depending on liquidity, concentration, uncertainty of market factors, pricing assumptions and other risks affecting the specific instrument.

(iii) Deferred tax assets

Deferred tax assets are recognised for deductible temporary differences, unused tax losses and unused tax credits to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Management judgement is required to determine the amount of deferred tax assets that can be recognised, based on the likely timing and level of future taxable profits, together with future tax planning strategies. In determining the timing and level of future taxable profits together with future tax planning strategies, the Group assessed the probability of expected future taxable profits based on expected revenues for the next five years. Details of the Group's recognised and unrecognised deferred tax assets and liabilities are as disclosed in note 32.

(iv) Impairment testing for cash-generating units containing goodwill

On an annual basis, the Group carries out impairment assessments of its cash generating units containing goodwill. The recoverable amounts of the cash-generating units (CGU) are determined based on value-in-use calculations which require the use of estimates including discount rates and terminal growth rates. Management's estimates of the recoverable amounts of these CGU's is sensitive to these estimates. The key assumptions underlying the recoverable amounts as well as sensitivity analysis of these key assumptions are disclosed in note 31.

(v) Determination of incremental borrowing rate used for discounting lease liabilities

The incremental borrowing rate is defined by IFRS 16 as the rate of interest that a lessee would have to pay to borrow, over a similar term and with a similar security, the funds necessary to obtain an asset of a similar value to the cost of the right-of-use asset in a similar economic environment.
The effective borrowing rate used for discounting the future lease payments to present value was determined by using the corresponding FGN Bond/Bill yields of similar maturity profiles with the outstanding lease terms in addition to the Bank's risk premium based on the interest rate of the Bank's quoted subordinated series 3 notes. Hence, the bank applied a single discount rate to a portfolio of leases with reasonably similar characteristics but matched with their relevant lease terms.

(b) Critical accounting judgments in applying the Group's accounting policies

Critical accounting judgments made in applying the Group's accounting policies include:

(i) Fair value of equity instruments

The fair value of financial instruments is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e., an exit price) regardless of whether that price is directly observable or estimated using another valuation technique. When the fair values of financial assets and financial liabilities recorded in the statement of financial position cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this is not feasible, estimation is required in establishing fair values. Judgements and estimates include considerations of liquidity and model inputs related to items such as credit risk (both own and counterparty), funding value adjustments, correlation and volatility. For further details about determination of fair value please see the Group's accounting policy on valuation of financial instruments in note 6.

(ii) Allowance for credit losses

In estimating credit losses, the Group considers the credit worthiness and financial capacity of the obligor, the probability that an obligor or counterparty will default over a given period (probability of default -PD) , the portion of the loan expected to be irrecoverable at the time of loan default (loss given default - LGD) and Exposure at Default (EAD). The table below shows the sensitivities of the impairment loss provision for 1% increase or decrease in the LGD and PD.

	30 June 2021		31 December 2020	
	Probability of Default -PD	**Loss Given Default-LGD**	**Probability of Default - PD**	**Loss Given Default-LGD**
In millions of Nigerian Naira				
Increase/decrease				
1% increase	60	330	128	148
1% decrease	(60)	(330)	(125)	(148)

(iii) Determination of the lease term for lease contracts with renewal

The Group determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Group applies judgement in evaluating whether it is reasonably certain to exercise the option to renew. The Group considers lease contracts which by our own assessment would mature in the next 12 months to 3 years and also consider relevant factors that create an economic incentive for it to exercise the renewal.

9 Operating segments

Segment information is presented in respect of the Group's geographic segments which represents the primary segment reporting format and is based on the Group's management and reporting structure. The Chief Operating Decision Maker (Board of Directors), reviews the Group's performance along these business segments and resources are allocated accordingly.

Geographical segments

The Group operates in the following geographical regions:

· **Nigeria:** This comprises UBA Plc (excluding the branch in New York), UBA Pensions Custodian Limited

· **Rest of Africa:** This comprises all subsidiaries in Africa, excluding Nigeria. The African subsidiaries have been aggregated into one reportable segment as they are deemed to have similar economic characteristics.

· Rest of the world: This comprises UBA UK Limited and UBA New York branch. Although this part of the business is not large enough to be presented as a separate reporting segment, it has been included here as it is seen as a potential growth segment which is expected to materially contribute to group revenue in the future. The entities within this reporting segment have been aggregated into one reportable segment as they have similar economic characteristics.

Business segments

The Group operates in the following business segments:

Corporate Banking - This business segment provides a broad range of financial solutions to multinationals, regional companies, state-owned companies, non-governmental organisations, international and multinational organisations and financial institutions.

Retail/ Commercial banking – This business segment has presence in all major cities in Nigeria and in nineteen other countries across Africa where the Group has operations . It provides commercial banking products and services to the middle and retail segments of the market.

Treasury and Financial Markets – This segment provides innovative financing and risk management solutions and advisory services to the Group's corporate and institutional customers. The segment is also responsible for formulation and implementation of financial market products for the Group's customers.

No single external customer or group amounts to 10% or more of the Group's revenues.

The revenue from external parties reported to the Chief Operating Decision Maker is measured in a manner consistent with that in the profit or loss statement.

Inter-segment transactions, balances, income and expenses on transactions between group companies are eliminated. Profits and losses resulting from inter-segment transactions that are recognised in assets are also eliminated. Transfer prices between operating segments are based on the Group's internal pricing framework.

12 Impairment charge for credit losses on financial assets	Group	Group	Bank	Bank
In millions of Nigerian Naira	Jun. 2021	Jun. 2020	Jun. 2021	Jun. 2020
Impairment charge for credit losses on loans and advances to customers:				
- impairment charge for credit losses (Note 25(c))	2,702	6,958	47	4,583
Impairment charge for credit losses on loans and advances to banks:				
- Impairment charge / (Reversal) for credit losses ((Note 24)	1,008	(770)	883	(770)
Impairment charge for credit losses on investment securities	209	156	209	108
Impairment charge for credit losses on off-balance sheet items	1,574	2,608	1,574	2,608
Write-off on loans and receivables	1,248	1,228	1,256	797
Reversal of credit loss expense	(1,678)	(1,545)	(205)	(63)
Impairment / (Reversal) charge on other assets (Note 27(a))	(926)	(828)	(1,619)	(194)
	4,137	7,807	2,145	7,069

13 Fees and commission income

In millions of Nigerian Naira	Group Jun. 2021	Group Jun. 2020	Bank Jun. 2021	Bank Jun. 2020
Credit-related fees and commissions[1]	7,409	5,035	3,628	3,781
Commission on turnover	1,989	693	-	-
Account maintenance fee	5,427	3,588	5,427	3,588
Electronic banking income	29,603	17,932	17,058	9,977
Funds transfer fee	7,081	3,854	49	108
Trade transactions income [2]	9,901	9,492	5,342	3,260
Remittance fees	3,100	3,550	1,645	2,927
Commissions on transactional services	6,623	9,063	1,508	2,666
Pension funds custody fees	2,952	2,661	-	-
	74,085	55,868	34,657	26,307

[1] Credit related fees and commission income excludes amount included in determining effective interest rates on financial assets carried at amortized cost. Credit related fees are taken over the life of the related facility, whilst transaction related fees are earned when the service is rendered.

[2]Trade transactions income entails one-off charges as related to letter of credits and other trade businesses which are excluded from those included in determining effective interest rates on those carried at amortized cost

14 Fees and commission expense

In millions of Nigerian Naira	Group Jun. 2021	Group Jun. 2020	Bank Jun. 2021	Bank Jun. 2020
E-Banking expense	22,493	14,512	17,519	10,465
Trade related expenses	2,845	1,375	2,420	1,352
Funds transfer expense	2,979	1,399	30	27
	28,317	17,286	19,969	11,844

15 Net trading and foreign exchange income

In millions of Nigerian Naira	Group Jun. 2021	Group Jun. 2020	Bank Jun. 2021	Bank Jun. 2020

20 Taxation

Recognised in the statement of comprehensive income

In millions of Nigerian Naira	Group Jun. 2021	Group Jun. 2020	Bank Jun. 2021	Bank Jun. 2020
(a) Current Income tax expense				
Current period	15,392	9,732	770	1,079
	15,392	9,732	770	1,079
(b) Deferred tax expense				
Origination and reversal of temporary differences (Note 32)	213	2,966	-	-
Total income tax expense	15,605	12,698	770	1,079

(c) Current Income tax liabilities

	Group Jun. 2021	Group Dec. 2020	Bank Jun. 2021	Bank Dec. 2020
Balance, beginning of period	9,982	9,164	1,478	722
Income tax paid	(18,268)	(14,688)	(578)	(694)
Income tax charge	15,605	15,506	770	1,449
Balance, end of period	7,319	9,982	1,670	1,478

(d) Reconciliation of effective tax rate

The tax on the Group's profit before tax differs from the theoretical amount that would arise using the tax rate applicable to profits of the Bank (Parent). The reconciliation of amount reported as tax expense in the statement of comprehensive income to the income tax using the domestic corporation tax rate is presented below:

In millions of Nigerian Naira	Group Jun. 2021	Group Jun. 2020	Bank Jun. 2021	Bank Jun. 2020
Domestic corporation tax rate	30%	30%	30%	30%
Profit before income tax	76,186	57,129	24,907	20,630
Income tax using the domestic corporation tax rate	22,590	17,139	7,472	6,189
Tax effects of :				
Information Technology Levy	331	240	240	240
Nigerian Police Trust Fund Levy	2	1	1	1
Minimum tax/excess dividend tax adjustment	438	874	874	874
Effect of permanent differences - income not subject to tax	(35,875)	(15,809)	(15,103)	(15,809)
Effect of permanent differences - expenses not deductible	15,115	9,009	4,963	9,009
Effect of temporary differences not recognised in Deferred Tax	11,249	(69)		(69)
Losses/(Relief) not recognised in Deferred Tax	1,755	1,313	2,323	644
Total income tax expense in profit or loss	15,605	12,698	770	1,079
Effective tax rate	20%	22%	3%	5%

Income tax payable for parent is based on the minimum tax provisions in the Nigerian tax law, which is applicable to companies that do not have taxable profits.

21 Earnings per share

The calculation of basic earnings per share as at 30 June 2021 was based on the profit attributable to ordinary shareholders of N57.767 billion (Bank: N24.137 billion) and the weighted average number of ordinary shares outstanding of 34.199 billion (Bank: 34.199 billion). The Bank had no dilutive instruments as at period end (June 2020 : nil). Hence the basic and diluted earnings per share are equal.

In millions of Nigerian Naira	Group Jun. 2021	Group Jun. 2020	Bank Jun. 2021	Bank Jun. 2020
Profit attributable to equity holders of the parent	57,767	42,530	24,137	19,551
Weighted average number of ordinary shares outstanding *(in millions)*	34,199	34,199	34,199	34,199
Basic and diluted earnings per share (Naira)	1.69	1.24	0.71	0.57

22 Cash and bank balances

In millions of Nigerian Naira	Group Jun. 2021	Group Dec. 2020	Bank Jun. 2021	Bank Dec. 2020
Cash	125,045	121,140	66,250	70,896
Current balances with banks	410,960	291,225	253,104	176,665
Unrestricted balances with central banks	192,838	231,533	18,266	65,930
Money market placements (note (i) below)	216,689	126,832	205,336	51,237
Restricted balances with central banks (note (ii) below)	1,119,489	1,103,888	1,107,585	1,072,094
	2,065,021	1,874,618	1,650,541	1,436,822

(i) Money market placements comprise funds deposited with other financial institutions for agreed tenors

(ii) Restricted balances with central banks comprise:

In millions of Nigerian Naira				
Mandatory reserve deposits with central banks (note (a) below)	1,064,771	1,049,170	1,052,867	1,017,376
Special Intervention Reserve (note (b) below)	54,718	54,718	54,718	54,718
	1,119,489	1,103,888	1,107,585	1,072,094

(a) This represents amounts held as cash reserve requirement with central banks of the countries in which the Bank and its subsidiaries operate, and is not available for use in the Group's day-to-day operations.

(b) This represents the Bank's contribution to the Central Bank of Nigeria's (CBN) Real Sector Support Facility (RSSF), warehoused in the Special Intervention Reserve held with the CBN. The Real Sector Support Facility is to be channeled towards providing credit to priority sectors of the Nigerian economy. As stipulated by the CBN, the Bank's contribution is 5% of its total naira deposits.

(ii) Cash and cash equivalents for the purposes of the statements of cash flows include the following :

	Group Jun. 2021	Group Dec. 2020	Bank Jun. 2021	Bank Dec. 2020
Cash and current balances with banks	536,005	412,365	319,354	247,561
Unrestricted balances with central banks	192,838	231,533	18,266	65,930
Money market placements (less than 90 days)	145,543	75,595	137,925	44,837
Financial assets held at FVTPL (less than 90 days)	4,782	75,101	4,782	75,101
Cash and cash equivalents	879,168	794,594	480,327	433,429

23 Financial assets at fair value through profit or loss

In millions of Nigerian Naira	Group Jun. 2021	Group Dec. 2020	Bank Jun. 2021	Bank Dec. 2020
Government bonds	56,269	38,153	-	2,948
Promissory notes	70	75	70	75
Treasury bills (less than 90 days maturity) (note (i) below)	4,782	75,101	4,782	75,101
Treasury bills (above 90 days maturity)	86,746	101,071	9,403	92,934
	147,867	214,400	14,255	171,058
Current	147,867	214,400	14,255	171,058

Note 23 continued

Fixed income trading activities are restricted to the parent alone.

(i) This represents treasury bills measured at fair value through profit or loss, with maturity within three months from the date of purchase. They are highly liquid, readily convertible to known amounts of cash and subject to insignificant risk of changes in value. They are included as cash and cash equivalents for the purpose of the statement of cash flows.

There were no capitalised borrowing costs related to the internal development of software during the period (December 2020: nil). Computer software has a definite useful life of not more than five years while goodwill has an indefinite useful life and is annually assessed for impairment.

* Transfers represents reclassification of items from property and equipment (work in progress) to intangible assets - purchased software (work in progress) during the period as disclosed in Note 30.

Impairment testing for cash-generating units containing Goodwill

For the purpose of impairment testing, goodwill acquired through business combinations is allocated to cash generating units (CGUs) as the goodwill is monitored at the level of the individual cash generating units. UBA Benin and UBA UK Limited have been identified as individual cash generating units. UBA Benin and UBA UK Limited operate under Rest of Africa and Rest of the World geographic segments respectively. The recoverable amounts of the CGUs have been determined based on value-in-use calculations; using cash flow projections based on financial forecasts covering a period of five years. Cash flows beyond the five-year period are extrapolated using estimated economic growth rates for the respective CGUs. These growth rates are consistent with forecasts included in industry reports specific to the economic environment in which each of the CGU's operates.

The following table sets out the key assumptions used in the value-in-use calculations:

	UBA Benin		**UBA UK Limited**	
	June. 2021	**Dec. 2020**	**June. 2021**	**Dec. 2020**
Gross earnings (% annual growth rate)	15.0	12.4	9.0	8.0
Deposits (% annual growth rate)	10.0	6.0	6.0	10.0
Loans and advances (% annual growth rate)	15.0	12.0	10.0	11.0
Operating expenses (% annual growth rate)	16.0	3.0	9.0	3.0
Terminal growth rate (%)	3.9	1.2	1.3	3.6
Discount rate (pre-tax) (%)	27.6	13.9	6.2	4.6

The values assigned to each of the above key assumptions were determined as follows:

Assumption	**Approach used in determining values**
Gross earnings	This is the average annual growth rate over the five-year period. Based on past performance, expectations of market development and the expected positive impact of deposits and loan growth in the forecast period.
Deposits	This is the average annual growth rate over the five-year period. Deposits have been determined to be the key value driver for the CGUs. Projected deposits growth is based on past performance of the CGUs as well as management's plans to expand the businesses and deepen customer base.

Loans and advances	This is the average annual growth rate over the five year period. It is based partly on past performance but largely on the expected positive impact of the forecasted growth in deposits.
Operating expenses	This is the average annual growth rate over the five year period. It is based on the current structure of business of the respective CGUs, adjusting for expected inflationary increases but not reflecting any future restructurings or cost saving measures.
Terminal growth rate	This is the average growth rate used to extrapolate cash flows beyond the five-year period. Based on estimated economic growth rates for the respective CGUs.
Discount rate	The discount rate was a pre-tax measure based on the longest tenured government bond issued by the governments in Benin and United Kingdom respectively adjusted for a risk premium to reflect both the increased risk of investing in equities and generally and the systematic risk of the specific CGU.

Below is the result of the impairment test:

	UBA Benin		UBA UK Limited	
	June. 2021	**Dec. 2020**	**June. 2021**	**Dec. 2020**
In millions of Nigerian Naira				
Recoverable amount	40,136	40,136	46,732	46,732
Less: Carrying amount				
Goodwill	(6,504)	(6,553)	(4,455)	(4,343)
Net assets	(21,798)	(21,493)	(15,433)	(16,513)
Total carrying amount	(28,302)	(28,046)	(19,888)	(20,856)
Excess of recoverable amount over carrying amount	**11,834**	**12,090**	**26,844**	**25,876**

The key assumptions described above may change as economic and market conditions change. The results of the value-in-use calculations are most sensitive to changes in the deposit growth rates, terminal growth rates and discount rates applied. The recoverable amounts of the respective CGUs would equal their carrying amounts if these key assumptions were to change as follows:

	Jun. 2021		Dec.2020	
	%	**%**	**%**	**%**
UBA Benin	**From**	**To**	**From**	**To**
Deposit growth rate	10.0	8.5	6.0	15.0
Discount rate	27.6	35.0	13.9	18.9
UBA UK Limited				
Deposit growth rate	6.0	8.0	10.0	5.0
Discount rate	6.1	16.0	4.6	5.4

Management have considered and assessed reasonably possible changes for other key assumptions and have not identified any instances that could cause the carrying amount of the respective CGUs to exceed their recoverable amounts.

32 **Deferred tax assets and liabilities**

Recognised deferred tax assets and liabilities

Deferred tax assets and liabilities are attributable to the following:

Unrecognised deferred tax assets

Deferred income tax assets are recognised for tax loss carry-forwards to the extent that the realisation of the related tax benefit through future taxable profits is probable. Unused tax losses for which no deferred tax asset has been recognised was N67.6 billion (2020: N58 billion).

33 **Derivative financial instruments**

The table below shows the fair values of derivative financial instruments recorded as assets or liabilities together with their notional amounts. The notional amount which is recorded gross, is the amount of a derivative's underlying asset, reference rate or index and is the basis upon which changes in the value of derivatives are measured. The notional amounts indicate the volume of transactions outstanding at period end and are indicative of neither the market risk nor the credit risk.

37.1 This represents on-lending facilities provided by the Central Bank of Nigeria (CBN):

(a) N17.699 billion of this facility represents the outstanding balance on the Commercial Agriculture Credit Scheme granted to the Bank for the sole purpose of granting loans, at subsidised rates, to the agricultural sector. Interest on the facility cannot exceed 5% per annum inclusive of all charges and is to be shared between the Bank and CBN at 4% and 1% respectively. The facility will terminate on 30 September 2025. The Bank is the primary obligor to CBN and assumes the risk of default.

(b) N35.160 billion of this facility represents the outstanding balance on the concessionary loans granted by the Central Bank of Nigeria to some State Governments. The facility attracts an interest rate of 1% and the Bank is under obligation to lend to participating states at a maximum rate of 5% per annum (inclusive of all charges). The principal is repayable monthly and the tenor of the facility is 20 years.

(c) N13.857 billion of this facility represents the outstanding balance on the loan granted by the Central Bank of Nigeria with respect to Real Sector Support Facility (RSSF) initiative to support the Federal Government's Special Fertilizer Intervention programme. The Central Bank shall lend to the Bank at 1% while the Bank shall on-lend to the customer at a maximum interest rate of 3.5% per annum, all charges inclusive. The 1% interest shall be remitted to CBN on a quarterly basis. The principal is repayable quarterly (after a one year moratorium) and the tenor of the facility is 7 years.

37.2 This represents an intervention credit granted to the Bank by the Bank of Industry (BOI) for the purpose of refinancing/restructuring existing loans to Small and Medium Scale Enterprises (SMEs), manufacturing companies and companies in the power and aviation industries. The maximum tenor of term loans under the programme is 15 years while the tenor for working capital is one year, renewable annually subject to a maximum tenor of five years. A management fee of 1% per annum, deductible at source in the first year and quarterly in arrears thereafter, is paid by the Bank under the intervention programme and the Bank is under obligation to on-lend to customers at an all-interest rate of 5% per annum. The Bank is the primary obligor to CBN/BOI and assumes the risk of default.

37.3 The $46.975million outstanding loan facility was granted under the Nigeria Private Enterprise Finance Facility extended by the European Investment Bank to a group of financial institutions located in Nigeria. The purpose of the facility is to finance capital expenditure for development of intermediation capacities and support small and medium sized enterprises in Nigeria. The facility is for a tenor of 9 years. The interest rate on the facility is six months USD LIBOR plus 337 basis points and is payable semi-annually. Principal repayment will be on a semi-annual basis after a moratorium period of 36 months. Facility matures December 2025.

37.4 This represents the amount granted under a $150 million and $50 million loan facilities granted by African Export-Import Bank in November 2020 with two (2) and three (3) years tenor respectively. The facilities' Interest rate is three (3) months USD LIBOR plus 485 basis points and 316 basis points respectively. The interest repayments were on a quarterly basis while the principal repayment is due upon maturity in November 2022 and November 2023 respectively.

37.5 This represents the amortised cost of the Eurobond issued by the Bank on June 8, 2017. The $500million Notes have a tenor of 5 years with a maturity date of June 8, 2022 and a yield of 7.875%. The rate of interest (coupon) is 7.75% payable semi-annually with bullet repayment of the Principal sum at maturity.

37.6 This represents the amount granted under a $150million line of credit by African Development Bank in December 2016. The first tranche of $120million was disbursed to the Bank in December 2016 while the second tranche of $30 million was disbursed to the Bank in November 2017. The facility oustanding balance is $87.5million for a tenor of 8 years and is to be used for medium term financing and on-lending to infrastructure projects, small and medium sized enterprises and women-owned enterprises in the Federal Republic of Nigeria. The interest rate on the facility is six months USD LIBOR plus 440 basis points and is payable semi-annually. Principal repayment will be on a semi-annual basis after a moratorium period of 2 years. Facility matures December 2024.

37.7 This represents the amount granted under a $20 million trade loan facility granted by Agence Francaise de Development (AFD) in May 2020. The facility is for a tenor of ten (10) years and Interest rate is six (6) months USD LIBOR plus 303 basis points. The interest repayments are payable semi-annually while the principal repayment will commence on a semi-annual basis following the 3 year grace period, final maturity is in May 2029.

37.8 This represents the amount granted under a $85 million trade loan facility granted by Proparco in April 2020. The facility is for a tenor of seven (7) years and Interest rate is six (6) months USD LIBOR plus 303 basis points. The interest repayments are payable semi-annually while the principal repayment will commence on a semi-annual basis following the 2 year grace period, final maturity is in April 2027.

37.9 This represents the outstanding balance on the $50 million trade loan facilities granted by Sumitomo Mitsui Banking Corporation in March 2021. The facility is for a tenor of 6 months and Interest rate is three (3) months USD LIBOR plus 360 basis points. The principal repayment is due upon maturity in September 2021.

37.10 'This represents the outstanding balance on the $40 million and $100 million trade loan facilities granted by Mashreq Bank in January and March 2021 respectively. The facilities are for a tenor of six (6) months and Interest rate is six (6) months USD LIBOR plus 375 basis points and three (3) months USD LIBOR plus 385 basis points. The interest and principal repayments are due upon maturity in July and September 2021 respectively.

37.11 This represents the amount granted under a $75 million trade finance loan facility granted by Rand Merchant Bank in March 2021. The facility is for a tenor of six (6) months and Interest rate is three (3) months USD LIBOR plus 375 basis points. The interest and principal repayments are due upon maturity in August 2021.

37.12 'This represents the outstanding balance on the $25million term loan facility arranged by Africa Trade Finance Limited, United Kingdom in February 2021. The facility is a trade-related term loan with a tenor of six (6) months and interest rate of three months USD LIBOR plus 300 basis points. The interest and principal repayments are due upon maturity in August 2021.

38 Capital and reserves

(a) Share capital

Share capital comprises:

	Group Jun. 2021	Group Dec. 2020	Bank Jun. 2021	Bank Dec. 2020
(i) Authorised - 45,000,000,000 Ordinary shares of 50k each	22,500	22,500	22,500	22,500
(ii) Issued and fully paid - 34,199,421,366 Ordinary shares of 50k each	17,100	17,100	17,100	17,100

The movement in the share capital account during the period is as follows:

In millions	Group Jun. 2021	Group Dec. 2020	Bank Jun. 2021	Bank Dec. 2020
Number of shares in issue at start of the period	34,200	34,200	34,200	34,200
Number of shares in issue at end of the period	34,200	34,200	34,200	34,200

(b) Share premium

Share premium is the excess paid by shareholders over the nominal value for their shares.

(c) Retained earnings

Retained earnings is the carried forward recognised income net of expenses plus current period profit attributable to shareholders.

(d) Other Reserves

Other reserves include the following:

In millions of Nigerian Naira	Group Jun. 2021	Group Dec. 2020	Bank Jun. 2021	Bank Dec. 2020
Translation reserve (note (i))	46,787	40,512	-	-
Statutory reserve (note (ii))	120,516	115,379	101,072	97,451
Fair value reserve (note (iii))	96,850	122,807	97,352	123,421
Regulatory (Credit) risk reserve (note (iv))	69,809	45,496	47,250	45,773
	333,962	324,194	245,674	266,645

(i) Translation reserve

Translation reserve comprises all foreign exchange differences arising from translation of the financial statements of foreign operations.

(ii) Statutory reserve

Statutory reserve includes:

- Statutory reserve: this represents the cumulative appropriation from earnings in accordance with existing legislation that require the Bank to make an annual appropriation, In the current period, the Bank transferred N3.62 billion representing 15% (2020: 15%) of its profit after taxation to statutory reserves.

- Small and Medium Enterprises Equity Investment Scheme (SMEEIS) reserves of N2.635 billion as at 30 June 2021 (December 2020: N2.635 billion) . The Bank has since suspended further appropriation to SMEEIS reserve in line with the directives of the Central Bank of Nigeria.

- Agriculture/Small and Medium Enterprises Equity Investment Scheme (AGSMEEIS) reserves of N9.938 billion as at 30 June 2021(December 2020: N9.938). The reserve was set aside in compliance with Central Bank of Nigeria's directive of April 2017.

(iii) Fair value reserve

The fair value reserve includes the net cumulative change in the fair value of investments at fair value through other comprehensive income. Such fair value changes are maintained until the investment is derecognised or impaired.

(iv) Regulatory (Credit) risk reserve

The regulatory (credit) risk reserve represents the difference between the impairment on loans and advances determined using the prudential guidelines issued by the various Central Banks of the various operating jurisdictions compared with the expected credit loss model used in determining the impairment loss under IFRSs.

Where the loan loss impairment determined using the prudential guidelines is greater than the loan loss impairment determined using the expected credit loss model under IFRSs, the difference is transferred to regulatory credit risk reserve and it is non-distributable to owners of the parent. When the prudential provisions is less than IFRS provisions, the excess charges resulting is transferred from the regulatory reserve to retained earnings to the extent of the non-distributable reserve previously recognised.

39 Dividends

The Board of Directors has proposed an interim dividend of N0.20 per share (30 June 2020: N0.17 per share) from the retained earnings account as at 30 June 2021.

The number of shares in issue and ranking for dividend represents the outstanding number of shares as at 30 June 2021 and 31 December 2020 respectively.

Payment of dividend to shareholders is subject to withholding tax at a rate of 10%.

40 Contingencies

(i) Litigation and claims

The Bank, in the ordinary course of business is currently involved in 833 legal cases (2020: 1000). The total amount claimed in the cases against the Bank is estimated at N459.28 billion (2020: N385.07billion). The directors having sought the advice of professional legal counsel, are of the opinion that no significant liability will crystalise from these cases beyond the provision made in the financial statements.

(ii) Contingent liabilities

In the normal course of business, the Group conducts business involving acceptances, performance bonds and indemnities. Contingent liabilities and commitments comprise acceptances, endorsements, guarantees and letters of credit.

The following tables summarise the nominal principal amount of contingent liabilities and commitments with off-balance sheet risk. There are no guarantees, commitments or other contingent liabilities arising from related party transactions.

In millions of Nigerian naira	**Group Jun. 2021**	**Group Dec. 2020**	**Bank Jun. 2021**	**Bank Dec. 2020**
Performance bonds and guarantees	293,734	170,988	286,766	163,793
Allowance for credit losses	(2,047)	(941)	(2,047)	(756)
Net carrying amount	291,687	170,047	284,719	163,037
Letters of credits	1,059,975	687,841	388,039	194,880
Allowance for credit losses	(4,118)	(1,866)	(1,890)	(1,607)
Net carrying amount	1,055,857	685,975	386,149	193,273
Gross amount	1,353,710	858,829	674,805	358,673
Total allowance for credit losses	(6,165)	(2,807)	(3,937)	(2,363)
Total carrying amount for performance bonds and guarantees	1,347,545	856,022	670,868	356,310

(iii) Loan commitments

Loan commitments are irrevocable commitments to provide credits under pre-specified terms and conditions. The Group's loan commitments are usually conditioned on the maintenance of a satisfactory financial standing by the customer and absence of defaults on other covenants. At the reporting date, the Group had loan commitments amounting to N87.5 billion (December 2020: N95 billion) in respect of various loan contracts.

(iii) Capital commitments

Capital commitments are irrevocable contractual commitments for the acquisition of items of property and equipment or intangible assets. At the reporting date, the Group had capital commitments amounting to N6.131 billion (December 2020: N5.247 billion) in respect of authorised and contracted capital projects.

	Group Jun. 2021	Group Dec. 2020
In millions of Nigerian naira		
Property and equipment	4,274	3,458
Intangible assets	1,857	1,789
	6,131	5,247

41 Related parties and insider related credits

United Bank for Africa Plc (UBA Plc) is the ultimate parent/controlling party of the Group. The shares of UBA Plc are listed on the Nigerian Stock Exchange and held by widely varied investors.

Parties are considered to be related if one party has the ability to control the other party or exercise influence over the other party in making financial and operational decisions, or one other party controls both. The definition includes subsidiaries, associates, joint ventures as well as key management personnel.

(a) Subsidiaries

Transactions between United Bank for Africa Plc and the subsidiaries also meet the definition of related party transactions. Where these are eliminated on consolidation, they are not disclosed in the consolidated financial statements but are disclosed in the books of the Bank. The Bank's transactions and balances with its subsidiaries during the period and at period end are as follows:

(i) Cash and cash equivalents with the following subsidiaries are:

44 **Compliance with banking regulations**

During the period, the Bank paid the following penalty:

In millions of Nigerian Naira

	Description	Amount
1	None verification of a customer identity and delay in filing the related transaction report	13
2	Foreign exchange documentation lapses in respect of some Customers` accounts	260
	Total	**273**

45 **Evaluation of the impact of COVID-19**

The COVID-19 pandemic caused disruptions to global economic and social activities during the period ended 31 December 2020. However, in the period ended 30 June 2021, the global scene witnessed significant efforts at combatting the pandemic, which led to the discovery and administration of vaccines accross the globe. Most economies have also been largely re-opened, thereby leading to improved economic conditions. These have led to the recovery of most global markets as evidenced by rising crude oil and commodity prices amongst others. The Group has reviewed the current state of events and nothing has come to the attention of the Directors to indicate that the Group will not remain a going concern for at least twelve months from the date of this statement.

The Group has also assessed on a line-by-line basis the impact of Covid-19 on the amount presented on the statement of financial position and concluded that no further adjustment will be required in the financial statement. Whilst the Group continues to monitor the situation, updates will be provided as more new information becomes available and necessary adjustment will be reflected in the financial statements, if required.

46 **Events after the reporting date**

There were no events after the reporting date that could have material effect on the financial condition of the Group as at 30 June 2021 and the profit and other comprehensive income for the period then ended which have not been adjusted or disclosed.

Securities Trading Policy

In compliance with Rule 17.15 Disclosure of Dealings in Issuers' Shares, Rulebook of the Exchange 2015 (Issuers Rule)United Bank for Africa Plc maintains a Security Trading Policy which guides Directors, Audit Committee members, employees and all individuals categorized as insiders as to their dealing in the Bank's shares. The Policy undergoes periodic reviews by the Board and is updated accordingly. The Bank has made specific inquiries of all its directors and other insiders and is not aware of any infringement of the policy during the period.

Free Float Declaration

United Bank for Africa Plc with a free float percentage of 75.79% (and a free float value of N189,315,653,139.50) as at 30 June 2021, is compliant with free float requirements for companies listed on the Premium Board of The Nigerian Stock Exchange.
